By virtue of a warrant directed to me by G. F. Ruttan, Mayor of the Town of Napanee, I am instructed to call a meeting for the nomination of candidates for the office of Councillor for the Town of Napanee to fill the residue of the term of U. M. Wilson, Esq., resigned, and I do hereby, in

## TOWN COUNCIL.

Council Chamber,  
April 3rd, 1916.

Council met in regular session on Monday evening.

Present—Mayor Ruttan in the chair, Reeve Osborne and Councillors Ming, Steacy, Graham, Paul, Denison.

The minutes of the last regular session were read and confirmed.

### COMMUNICATIONS.

From Chas. Brooks, owner of Hay Bay ferry, asking the council for a grant of \$100 towards repairing approaches.

Ordered laid on the table until the estimates are prepared.

From the Caledonian Insurance Co., stating that the billeting of the 146th Batt. in the old band hall, being of a temporary nature, would not cause a change in the insurance policy on the building. Filed.

From A. J. Reid, of the C.N.R. legal department, acknowledging receipt of communication in reference to high grade of approaches crossing their tracks on the Belleville road, and stating that the matter would receive due consideration, and would then further communicate with the town. Filed.

From the Kingston General Hospital asking for assistance.

Ordered laid on the table until the estimates are prepared.

From the Provincial License Department in reference to reciprocal auto license exchange with the United States, stating that the question would receive careful consideration. Filed.

From the Canadian Serbian Relief Committee asking the council to contribute towards this relief work. Filed.

From U. M. Wilson tendering his resignation as a member of the town council. His resignation was caused by his appointment to the office of County Crown Attorney for Lennox and Addington, which disqualified him from serving as councillor.

Moved by Reeve Osborne and seconded by Coun. Steacy, that the resignation of U. M. Wilson be accepted, and that the clerk, in a communication, express to Mr. Wilson the regret of the members of the council at the loss of his valued services. Carried.

A warrant was read from Mayor Ruttan calling upon the town clerk, Mr. W. A. Grange, to take the necessary proceedings for filling the vacancy in the council caused by the resignation of U. M. Wilson. The warrant specified that a nomination meeting be held in the town hall, on Wednesday, April 12th, at the hour of 7.30 in the evening, and that an election be held one week later, if more candidates were nominated than was necessary to fill the vacancy.

A letter addressed to Mayor Ruttan, from the Kingston Whig, was read.

OPPOSITE DOMINION BANK.

Town of Napanee, I am instructed to call a meeting for the nomination of candidates for the office of Councillor for the Town of Napanee to fill the residue of the term of U. M. Wilson, Esq., resigned, and I do hereby, in pursuance of said warrant, call upon the electors to put in nomination a candidate or candidates as aforesaid at a nomination meeting to be held at the Town Hall, in the town of Napanee, on

**Wednesday, April 12th,**  
at 7.30 p.m.

If more than one candidate is put in nomination and more than one candidate qualifies pursuant to the Municipal Act in that behalf a poll will be opened on Wednesday, the 19th day of April, at nine o'clock in the morning and will continue open until five o'clock in the afternoon of the same day, and the said election will be held by the following Deputy Returning Officers and Poll Clerks, and at the following Polling Sub-divisions:

CENTRE WARD No. 1.—Polling place, town hall; Deputy-Returning Officer, J. M. Graham; Poll Clerk, Roy Moore.

CENTRE WARD No. 2—Polling Place, Mrs. Cronk's residence; Deputy-Returning Officer, Walter Metcalf; Poll Clerk, Richard McNeill.

WEST WARD No. 1—Polling Place, Frank Kinkley's residence; Deputy-Returning Officer, C. W. Bowen; Poll Clerk, James McGraw.

WEST WARD No. 2—Polling Place, Public Library; Deputy Returning Officer, C. H. Lapum; Poll Clerk, Fred Hosey.

FAST WARD—Polling Place, W. J. Normile's shop; Deputy-Returning Officer, R. S. Wales; Poll Clerk, Geo. A. Caton.

W. A. GRANGE,  
Returning Officer.

Dated this 4th day of April, A.D., '16

All kinds of garden and lawn grass seed at WALLACE'S Drug Store Limited.

day, April 12th, at the hour of 7.30 in the evening, and that an election be held one week later, if more candidates were nominated than was necessary to fill the vacancy.

A letter addressed to Mayor Ruttan, from the Kingston Whig, was read. The Whig is issuing an "advertising number" and they were soliciting an order from the council for a number of copies. The fact that a descriptive article concerning the town of Napanee, written by Mayor Ruttan, and illustrated with a striking likeness of His Worship, would appear therein, was held out as an inducement why the town should buy a few hundred copies.

No action taken.

Lieut. J. J. Graham, was present and extended to the Mayor and Council an invitation to be present at an "Assault at Arms" and Smoking Concert to be given in the town hall, on Tuesday evening, April 4th, under the auspices of the "Napanee Platoon" of the 149th Batt.

The thanks of the council was extended to Lieut. Graham for his kind invitation.

The following facts concerning the sale of debentures were laid before the council:

To the Council and the Town of Napanee,—

We, your Mayor and clerk, to whom was referred the sale of a debenture at five and one-half per cent, payable twenty years from the first day of July, 1915, in annual instalments of one thousand two hundred and forty-four dollars (\$1244) each, the proceeds of which was to be used in payment of certain Local Improvement overdraft accounts in the Merchants Bank of Canada, Napanee, beg leave to report.

That the debenture was sold on the first day of April, for fifteen thousand, four hundred and seventy-nine dollars and ninety-nine cents (\$15,479.99), which included the accrued interest on these accounts up to the said first day of April, 1916. The proceeds of this sale were placed to the credit of the Town account in the Bank on the first of April and the following checks were issued against it:

\$1,772.54 to pay the Camden road sewer overdraft, in full to date.  
\$2,593.44 to pay the Robert Street sewer account in full.

\$1,226.36 to pay the East street sewer account in full.

\$48.05 to pay the Mill street sewer account in full.

\$8,226.26 was paid on the cement walk account to cover the overdraft up to the end of 1914 with accrued interest.

This covers Local Improvement accounts in full, excepting the cement walk account for 1915, Bridge Street Sewer account, \$741.23, Graham Street Sewer account, \$277.79.

The balance of the cement walk account as of the first of April is \$5387.36 and this with the Bridge Street and Graham Street accounts, leaves the overdraft accounts in the Merchants Bank on account of the Local Improvements \$6406.39 as of the first of April 1916, and we would recommend that a debenture be sold

(Continued on page 4).

### Is Your Photography a Success.

## TO REST

**T. G. CARSCALLEN.**  
Lillian Mair, beloved wife of T. Carscallen, M.L.A., passed away Tuesday morning, as the stroke. Deceased had two ring the past few years and near death more than once. Her sorrowing husband and sisters in Napanee. The place this (Friday) after-

### ISS STELLA AMEY.

Stella Amey, eldest daughter of Isaac Amey, died on Sunday after an operation in the Kins' Hospital, Baltimore. Amey gave up her position with Co. some months ago of ill health, and with her sister went to Belleville, did not improve and she was relieved through an operation and came. The remains went to Napanee on Monday and took place in Riverside

### W. A. CARSON.

Manager of the Napanee factory, but latterly manager of Port Dover Cannery, died on Sunday, after but a short illness from acute typhoid. He was taken ill at the factory of last week and was unwell from the time of Mr. Carson's many Napanee labours. He will be sorry to hear of his death and their sympathy goes to Carson and his daughter, Curran, in their sudden death. The remains were taken for burial on Wednesday.

### JOSHUA PENDILL.

Years in the employ of Vyle & Son, and a valued died on Wednesday morning. Pendill was suddenly taken ill with meningitis on Saturday at the G. T. Ry. station, went to his home and medical secured, but after a few days suffering he passed away. His widow, three daughters, wife, Watertown, and Miss Neta at home, remains. He was also a member of the re brigade, who will miss his services. The funeral took Wednesday afternoon to cemetery. Mrs. Pendill and her family have the sincere sympathy of their many friends in their bereavement.

### LEASAN LEY.

Mrs. Cooke, 75 years old, died on Tuesday evening, for the death of their eldest daughter, by pneumonia Thursday last week. The funeral took place Saturday afternoon, Rev. Mr. Cooke

## THE BOYS IN KHAKI.

### 80th BATTALION.

On Saturday last Lieut.-Col. Brown, general staff officer, with Major Watson, newly appointed second in command of the 80th Batt., put C Co. through a thorough inspection and expressed themselves well pleased with C Co. The officers were also examined in their work and given high marks.

Half of C Co. had their last leave on pass last week and the balance got their leave on Thursday and will return to duty on Tuesday.

The officers have not as yet received their last leave but are living in hopes.

On Tuesday Lieut.-Col. Stewart and Major Watson inspected the interior organization of C Co. and found everything satisfactory.

On Monday the medical officer of the 80th Batt., with the sergeant shoemaker visited C Co., and inspected the feet and footwear of the Co., also finished up the inoculation and vaccination of the men. The boots of the men were found to be the best of any company yet inspected by the Sgt. shoemaker.

Very few regular parades were held this week so many men being away on pass, though the men have done excellent work selling tickets for the farewell concert on Saturday eve. The advance sale of tickets is double what it was for the former concert. The people of Napanee appreciate a good entertainment and seats will probably be at a premium on Saturday evening.

Quartermaster Sgt. W. H. Fanting, has joined C Co. coming from the Quartermaster's stores at Belleville.

Lieut. Coward visited Kingston one night this week and "rode the goat".

Lieut. Mason is the only officer to receive last leave. He left for Toronto on Thursday and on expiration of his leave will report to the school of Infantry and bayonet fighting at Montreal and join the 80th on their way overseas. Quartermaster Sgt. Mercer and Sgt. Willis are also on leave and will report at Montreal.

It is rumored that the people of Napanee intend giving the C Co. a subscription to purchase comforts for the men when they go to the trenches. The officers have no definite information on the subject but hope it is true.

The 80th Batt. colors are now on sale at the canteen and at Robinson's Co.'s store. All profits go to the funds of C Co., so buy the colors and help the boys.

On Wednesday the 80th and 148th Battalions had a combined route march on the Kingston road with Capt. Nichol in command.

146th.

The Band of the 148th and a detachment from Kingston were in Napanee on Tuesday evening, for the smoker in the town hall. Lieut.-Col. C. A. Low, O.C., and Capt. Sutherland, accompanied the band to Napanee.

The Napanee Platoon, under Lieut. J. J. Graham and the Boy Scouts,

# Overland

---top class

---bottom price

This car is the result of a definite purpose to supply a definite need with definite finality.

It is built for the man whose purse cannot afford a big expensive car.

For the man whose pride cannot afford an unsightly, little uncomfortable car.

And it is a very definite success.

Beauty is not necessarily a matter of size.

Neither does size altogether control comfort.

But skill, experience and facilities are required to build a small, beautiful, comfortable, economical car.

In a word, it required Overland organization.

And here is the small, light car—complete to the last detail.

Its importance is on a par with its beauty, comfort and completeness.

And its price—\$850—is far below any former price for any completely equipped automobile—regardless of appearance or comfort considerations.

A glance at the car impresses you immediately with its beauty and finish.

As you look it over and read its specifications, you realize its absolute completeness.

But you must ride in it to appreciate its comfort.

You must drive it to get the thrill its performance will give you.

You can own one of these cars.

But act promptly—for no car was ever in such demand.

In spite of record productions and advancing prices, there is a shortage of cars.

The demand naturally centres on top class at bottom price—this small, light car.

And no other car at anywhere near its price can compare with this one for beauty, performance, comfort, completeness and economy.

Get in touch with us to-day—Now.

Black of Waupoos, spent Monday visiting his aunt, Mr. and Mrs. F. H. Napanee Road.

The Band of the 146th and a detachment from Kingston were in Napanee on Tuesday evening, for the smoker in the town hall. Lieut.-Col. C. A. Low, O.C., and Capt. Sutherland, accompanied the band to Napanee.

The Napanee Platoon, under Lieut. J. J. Graham and the Boy Scouts, under Assistant Scoutmaster A. Day, were lined up on the platform to meet them. They paraded the streets, giving the citizens an opportunity to listen to and admire the splendid band which Lieut.-Col. Low has gathered together. The assault-at-arms and concert given in the Town Hall was well attended. Selections were given by Sergt. W. McFeridge, Q.M., Sergt. Harte; vocal selections by Bert Weiss; boxing bouts by McKibbie and Stockbridge, and Blakey and Hartly, Parkes and Kennedy, and a wrestling bout between Ellerbeck of Glenburnie and MacKibbie of Montreal. Capt. Sutherland appealed for thirty more men from Napanee to complete the 100 asked for. Col. Low also gave a recruiting speech, appealing to the young men to do their duty and come forward.

## BELL ROCK.

There is no crossing over the long bridge at the present time, on account of the high water.

Our teacher, Mr. G. E. Lewis, visited his parents, at Camden East, last week.

Miss Libbie Pomeroy has returned home after spending several days with friends at Verona.

Mrs. J. Meeks spent a week recently with friends in Napanee.

Rev. Mr. Fairbairn, Verona, called on several families here last Monday.

W. Brooks has started on his annual tour of sawing wood.

F. L. Amey, Selby, at D. L. Amey's; Mr. and Mrs. D. Ball, Verona, at M. Percy's.

## Mean Fellow.

"Your wife has a muscular affection which renders her speechless. I can cure her, but it will take time."

"Take all the time you want, doc," responded the mean man.

## Too Fond of Them.

"Is he fond of outdoor sports?" "Yes. His wife complains that he even invites them home to dinner."

## NEWS TOPICS OF WEEK

Important Events Which Have Occurred During the Week.

The Busy World's Happenings Carefully Compiled and Put Into Handy and Attractive Shape for the Readers of Our Paper — A Solid Hour's Enjoyment.

### WEDNESDAY.

General Hughes, accompanied by Sir Max Aitken and Captain Bassett, visited Bramshott Camp yesterday and made an inspection of the troops under Lord Brooke's command.

German prisoners at Fort Henry have made another demand to be given work. Some of the men have been put to work getting the roads leading to the fort in proper shape.

One of the worst blizzards experienced in the British Isles in a quarter of a century raged Monday night and yesterday morning in the midlands and north of England and in Wales.

According to a Berlin report Dr. Haase, who organized a new party composed of 18 radical Socialists, resigned the presidency of the Socialist party at a meeting of the Managing Committee.

Following an illness extending over nearly a year, Dr. Robert Wallace Bruce Smith, the well-known sanity expert, died at his home, 271 Russell Hill road, Toronto, early yesterday morning.

Another wireless despatch from the Shackleton exploration ship Aurora received in London, confirms the previous view that there is a fair amount of stores available for the explorers marooned on the Ross Sea barrier.

According to an official announcement, a German flying squadron made a raid on Saloniki Monday, dropping many bombs on the new harbor and petroleum depot, and on the camp of the entente allies north of the town.

Two American citizens, Arthur Mackenzie of Savannah and Tom Fifer of Delaware, who were on board the British steamer Manchester Engineer, have made affidavits before the United States consul that the steamer was torpedoed without notice.

### THURSDAY.

The British House of Commons was interrupted by a demented soldier.

A number of munition workers at Glasgow were fined for quitting work.

The Ontario Government will increase the cost of marriage licenses to five dollars.

It was announced that Shackleton's ship Aurora would reach New Zealand Friday.

The Ontario Government is increasing its grant for good roads by one million dollars.

Ice carried away a comparatively new steel bridge over the Credit River near Streetsville.

Thomas Arthur and Alfred Dempsey, each six years of age, were drowned in Mill Creek, Galt.

The clauses on fuel oil tax and higher duty on apples were adopted in Committee of the Commons.

Mrs. Jane McLeod Chapman, declared to be one hundred and sixteen years old, died at Smith's Falls.

## DECLINE SUBSTITUTES

"sharks" are to be curtailed by legislation introduced yesterday by Attorney-General Lucas in the Legislature.

More than twelve thousand letters, containing thirty thousand suggestions, have been received by the City Clerk of Berlin, in the competition to obtain a new name for that city.

At the close of the financial year last night the Government issued a report showing that the total revenue of the United Kingdom for the year amounted to £336,766,824, being an increase of £110,072,744 over last year.

### MONDAY.

Donald Fraser, sr., one of New Brunswick's most prominent lumbermen, died at Fredericton, N.B.

The Austrian War Office has issued a bulletin stating that yesterday morning Italian aviators bombarded Adelsberg and killed two men.

Denys Cochin was appointed Minister of Blockade, a new position just created, similar to that held by Lord Robert Cecil in the British Government.

W. R. Shaw, of Galt, was sent up for trial Saturday before the county judge on the charge that he set fire to his poolroom in the Dietrich Block.

Dr. Theodore B. Sachs, widely known as an expert in tuberculosis, yesterday killed himself with poison at the Edwards Sanitarium at Napererville, Ills.

Mr. Walter Strong, a traveler for the Patterson Biscuit Company, who resided in Belleville city, died there very suddenly yesterday from an attack of apoplexy.

### TUESDAY.

The Turks claimed the destruction of a large Russian transport.

Great Britain denied there was any diplomatic crisis at The Hague.

The Berlin City Council has decided to join the Home Guard in a body.

A large number of German suspects have been rounded up in Paris.

About 180 wounded Canadian soldiers reached St. John by the Mississabie.

A strong anti-alcohol crusade has been organized by leading women of France.

Port Hope has been without water since Saturday, and the break in the main has not yet been located.

Rev. Zephelin Auclair, parish priest of St. Polycarpe, Que., dropped dead in his pulpit at high Mass.

Mr. W. O. Carson, Chief Librarian of the London Public Library, has

## FRENCH REGAIN G

Big Counter-Attack  
Recapture of Part of

German Advances of Saturday Are Rendered In Vigorous Onslaught of Petain's Troops at French Gain Now Me Entire Teuton Front.

PARIS, April 4.—The battle of the village of Vaux, a former stale in the Crown Prince against Verdun, east of the still raging furiously, but night settled upon the battle saw the French victorious in a large scale thus far after the most successful counter-attack undertaken by the Germans.

In fighting of the most character, which lasted a night and throughout Monday French counter-attack gallantly, until Monday night the captured the western part of the Caillette wood and to north of Vaux. All of these had been firmly held by the Prince's infantry after the drive on this sector Monday two previous days. Thus, part of the two-mile gain the Germans was wrested by the French in their attack.

The French War Office day afternoon's communiqué stated that the Germans succeeded in extending their an area of this length, and heavy losses were inflicted Teutonic columns as they ward in successive waves, netted by the French counter-attack not only reduces the tension considerably, but sends a great menace to German front in the De Vaux sector if the spirit an shown by General Petain's evidently a surprise to the keeps up.

As a result of onslaught both to the east and west Meuse the Germans captured remainder of the village which remained in possession French, and also a portion of the Caillette wood to the south of Fort Douaumont.

The Germans followed day night their success in village of Vaux on Friday an attack in very large force the French positions in the Mont-Vaux line, centring it against the Bois de la south-east of Fort Douaumont but were driven back into the wood by counter-attack.

The Germans used over a division (some 25,000 men) attack, which was preceded exceptionally heavy bombardment the heaviest German artillery attack was made four simultaneously.

As soon as the Germans forced their way into strong French counter-attack began at once, and part

Rev. Zepherin Auclair, parish priest of St. Polycarpe, Que., dropped dead in his pulpit at high Mass.

Mr. W. O. Carson, Chief Librarian of the London Public Library, has been appointed Provincial Inspector of Public Libraries.

Brigadier-General Leckie continues to make good progress, and strong hopes are now entertained for his complete recovery.

Germany has apologized to Switzerland for the bombing of the Swiss village of Porentry by German airmen last week, says a Reuter despatch from Berne.

The Rev. Edward Lyttelton, headmaster of Eton College, has resigned, owing to criticism of his declaration that Britain should extend the principles of Christian charity to Germany.

Rev. Thos. Nattress, formerly a Presbyterian minister, who resigned some years ago to enter commercial life, has decided to return to the ministry, having accepted a call to a Methodist church.

Giovanni Corelli, apparently out of curiosity, put his head under a 1,300 pound steam hammer at the Billings-Spencer plant in Welland and tripped it with his foot at the same time. His head was smashed flat.

### BARRIERS DAMAGED.

**Bad Weather Has Given German Subs Entry to North Sea.**

**PARIS, April 4.**—(Delayed.)—Owing to the fact that bad weather has damaged the Entente Allies' barriers, causing mines to drift and making the entrance to the channel easier, submarine activity in the North Sea has been more active during the last three weeks than for four months, according to a semi-official communication dealing with the marine situation. The communication says:

"During four months there was no torpedoing in the channel, but in the last three weeks enemy submarines have shown activity in this sea. This activity has succeeded owing to the fact that bad weather damaged the Allies' barriers, caused mines to drift and made entrance to the channel easier. The enemy doubtless possesses a large number of submarines, and can simultaneously attack in the North Sea and in the Mediterranean. Measures have been taken in concert with Great Britain to bar more effectively Pas de Calais and to multiply the trolleys.

### King Subscribes \$500,000.

**LONDON, April 4.**—King George has placed £100,000 at the disposal of the Treasury. A letter accompanying the donation says:

"It is the King's wish that this sum, which he gives in consequence of the war, should be applied in whatever manner deemed best in the opinion of his Majesty's Government."

### Rioters Killed in Austrian Cities

**ROME, April 4.**—Advices received here say that several women were killed in recent disorders in Vienna, Prague, Trieste, and Agram. Crowds of women attacked the Government offices, demanding bread and the conclusion of peace. The troops were called out, and fired upon the crowds, killing several women.

ultaneously.

As soon as the Germans forced their way into the strong French counter-attack begun at once, and part of the ground lost was recovered.

The official communiqué from the French War Office last announced that the French had entirely withdrawn from the village of Vaux, in which the Germans gained a footing on March 26, plotting their occupation attack of Friday night. The line now extends along the of the village.

During Friday night the Germans launched a terrific attack on the eastern bank of the Meuse with the village of Vaux in French hands as the The attack gained for the Germans foothold in the western part of the village, in the eastern part they gained several houses assault of March 11. This gave the Germans practical control of the village which lies north-east of the higher ground on which the fort bearing the name is situated. On the of the earlier German success the Germans sought to push forward the fort but were repulsed. Successes were won by the two heavy attacks. These covered the sector between to the south of Haudremont region of Vaux. The first which was in the nature of a attack by a large force, attacking from the north and the same time but failed to French lines on either side of the village. A second attack was immediately. By this attempt men were able to get a foothold in the western part of the village.

Four fresh brigades participated in the attack, which ended in the capture of the village, says witness of the battle.

The assault began with a attack, which is becoming more preferred by the Germans. Friday evening the village surroundings were copious. The attack began from the 3 o'clock in the morning gade debouching from the hillside east of Fort De and advancing as far as the line in front of the advanced position, where it was the French infantry and a battery which was so intense that tanks were unable to hold ground.

It was a fresh brigade with the second attack towards in the morning. It came east with an abundant supply of powerful grenades that the houses occupied by theers of the town. Though buried under the ruins the stuck stubbornly to the which they ceded only after a long and inflicted severe losses on the attacking force.

## CANADIANS IN BATTLE.

They Rendered Valuable Aid in St.  
Eloi Engagement.

CANADIAN HEADQUARTERS IN  
FRANCE, via London, April 4.—In  
the early morning of March 27 an as-  
sault was made on a section of the  
German defences by a British division  
immediately on the left of the  
Canadian corps. As a preliminary to  
the attack several large mines were  
successfully fired under a salient in  
the German lines, severely damaging  
the enemy's trenches and causing  
him numerous casualties.

Under cover of a very heavy arti-  
lery fire the attacking troops ad-  
vanced and succeeded in capturing  
the two lines of German trenches  
constituting the salient. The length  
of front trench seized was approxi-  
mately 600 yards, and the British  
troops established themselves on a  
new front line at one point as much  
as 400 yards in front of their origi-  
nal positions.

In the course of the fighting, which  
continued for several hours, heavy  
casualties were inflicted on the  
enemy, and five officers and 195 other  
ranks were taken prisoner. Many of  
the prisoners were passed back  
through the Canadian lines.

Throughout the attack the Cana-  
dian artillery and trench mortar  
batteries co-operated in the covering  
bombardment. A continuous barrage  
by shrapnel and high-explosive shells  
was placed on all the roads and  
tracks in rear of the German lines,  
effectively holding back the enemy  
supports. In several places German  
support trenches were taken in en-  
filade, and German parapets were  
breached or destroyed by our shells.  
A fortified building was completely  
demolished and numerous other  
enemy strong points were repeatedly  
shelled by our heavy howitzers.

## PIRACY WAR GOES ON.

British and Neutral Craft Destroyed  
by German Submarines.

LONDON, April 4.—The British  
steamship Ashburton has been sunk  
by shrapnel shells fired by a German  
submarine. Five members of the  
crew have been taken to hospitals.  
The vessel, according to the Ex-  
change Telegraph Company, was not  
armed.

The Ashburton sailed from New  
Zealand Feb. 23 for London, and  
was last reported as leaving Montevideo,  
Uruguay, March 1. The ves-  
sel was 4,445 tons gross, and was  
built in 1905 for the Australian  
Steamship Company of London. She  
was 392 feet long, 50 feet beam, and  
26 feet deep.

## Liner Achilles Sunk.

LONDON, April 4.—The British  
liner Achilles was sunk Friday. Four  
members of her crew are missing.  
The captain and sixty-two other per-  
sons from the steamer have been  
landed.

The Achilles was in the trade be-  
tween Australia and England. She  
was a vessel of 7,042 tons gross and  
owned by the Ocean Steamship Co.  
of Liverpool. She sailed from Sydney,  
N.S.W., January 19, for London and  
Liverpool. The last report of the  
Achilles shows that she left Cape  
Town, where she had evidently put  
in on voyage, March 6th.

## Norwegian Ship Sunk.

LONDON, April 4.—Lloyd's re-  
ports that the Norwegian steamship  
Peter Hamre was sunk Saturday

## CANTONMENTS RAIDED

REAL EVERYDAY LIFE.

Allied Aviators Retaliate For  
Bombing of Dunkirk.

Fleet of Thirty-one Aeroplanes Drop  
Eighty-three Shells on Keyem,  
Essen, Terrest, and Houthulst.  
While Another Squadron Attacks  
Conflans—German Zeppelin Visit  
to England Goes Hard With  
Raiders.

LONDON, April 4.—Despatches  
from Paris say that in retaliation for  
the bombardment of Dunkirk by a  
Zeppelin Sunday night, thirty-one  
allied aeroplanes dropped on the  
enemy cantonments at Keyem, Essen,  
Terrest, and Houthulst eighty-three  
shells of large calibre. Another  
squadron bombed the station at Con-  
flans.

Eight bombs were dropped by the  
enemy on Dunkirk. The material  
damage was not great, but two people  
were killed and four wounded.

On Monday numerous aerial combats  
were fought with success in the  
region of Verdun. French aviators  
brought down four German aer-  
planes, and other enemy machines  
took to flight or were forced to land.

Germany has apologized to Swit-  
zerland for the bombing of the Swiss  
village of Porencry by German air-  
men last week. A promise to punish  
the aviators, who supposed they  
were over Belfort, has been made.

Two more raids by Zeppelins  
occurred on Great Britain on Saturday  
and Sunday nights, making three  
raids on successive nights. At least  
16 persons were killed and about 100  
others injured in the Saturday night  
raid, which was over the north-east  
coast of England.

The coast of Scotland and the  
northern and south-eastern counties  
of England were attacked by Zep-  
pelins Sunday night.

A correspondent in a north-east  
coast town says that a Zeppelin was  
sighted there at 11 o'clock Saturday  
night. It dropped 14 explosive and  
seven incendiary bombs. Ten men,  
three women, and three children  
were killed, and 25 persons were seri-  
ously injured. In addition, about  
80 others received minor injuries.

A tramcar inspector was killed and  
a woman tram conductor had a leg  
blown off. Several houses were  
wrecked in one street. One house  
was completely wrecked, but the  
family of five managed to scramble  
out without serious injury.

As Seen on the Stage and Appreciated  
by Two Spectators.

Two women stood in a queue wait-  
ing to get in to see a melodrama.

"This'll be a good show," said the  
first woman. "Life, you know—real  
life—nothin' overdone."

"Yes, I like life, too," said the other.  
"I don't want to be put to sleep,  
though. Still, I can't stand nothin' far-  
fetched."

"Same here," said the first woman.

And then they went in and sat  
through five acts, wherein the hero killed  
thirty Kaffirs with his naked hand,  
found a diamond as big as a duck's  
egg, smashed with his revolver from  
a mile away the bottle of poison that  
the beautiful heroine was about to  
swallow rather than yield to the blan-  
dishments of the villain and finally  
killed the latter in an aeroplane duel,  
slightly off the stage, inheriting later  
an unexpected dukedom, and so forth,  
and so on.

When the curtain fell to the sound  
of wedding bells the two women looked  
at each other with glistening eyes.

"Grand, wasn't it?" said the first.  
"Life, real life, eh?"

"You bet," said the second. "That's  
life, that is—nothin' farfetched or over-  
done."

## LUCK IN A MISTAKE.

When the Famous Singer Albani First  
Went to London.

The curious story of Mme. Albani's  
first London engagement is as follows:  
Colonel Mapleson heard of her singing  
at a theater at Malta, and, thinking  
that she would be successful, he made  
her an offer through an agent of a con-  
tract to sing in Her Majesty's theater.  
She agreed to it and went to London,  
but on arriving there she told the cab-  
man to drive her to the Italian opera  
house.

He, instead of going to Her Majes-  
ty's, took her to Covent Garden, which  
was also devoted to Italian opera. She  
was shown up to the manager's office  
and stated that she had come to sign  
the contract which Mr. Mapleson had  
offered her.

Mr. Gye, thinking to play a joke on  
his rival, Mapleson, made out a con-  
tract, and Albani signed it. Mr. Gye  
then told her that he was not Colonel  
Mapleson, but that he could do much  
better by her. He offered to tear up  
the contract if she liked, but told her

PA) four points sim-

#### Norwegian Ship Sunk.

LONDON, April 4.—Lloyd's re-  
ports that the Norwegian steamship  
Peter Hamre was sunk Saturday  
night while at anchor. One man, the  
sole survivor of the crew of 15, has  
been landed from Kentish Knock  
Lightship. The Peter Hamre had a  
tonnage of 1,080 gross, and was 234  
feet long. She was owned by S. Ton-  
neson & Co. of Bergen, Norway.

#### ALLIES' FAITH UNSHAKABLE.

#### Asquith Says Entente is Determined to Conquer Germany.

ROME, April 1, via Paris 4.—Her-  
bert H. Asquith, the British Prime  
Minister, was the guest last night at  
a great public reception given at the  
capitol by Prince Prospero Colonna,  
Mayor of Rome. In the course of his  
speech Mr. Asquith said:

"In this place and in the gravest  
moment of the world's history, I  
want to reaffirm the unshakable  
faith of the Allies in the cause of  
liberty and justice, and to proclaim  
our irrevocable determination to con-  
quer, to protect weaker peoples, and  
also not to tolerate the violation of  
elementary social laws after centuries  
of struggle."

The Premier sent a "message of  
faith and affectionate salutation" to  
the "heroic army of Italy and to the  
whole Italian people." He reminded  
his hearers that this was the first  
time a British premier had been re-  
ceived by "the first citizen of Rome  
in the capitol—the temple and citadel  
of the ancient world, the outpost  
of the world of the middle ages, and  
now a monument symbolic of the re-  
naissance and the unity of Italy."

After the reception Premier As-  
quith received a delegation of repre-  
sentatives of the Italian press.

#### March Shipping Loss Extensive.

LONDON, April 4.—The Board of  
Trade's summary of casualties to  
British shipping reported in March  
shows that 19 steamers, aggregating  
44,600 tons, and eight sailing ves-  
sels of 1,865 tons, were sunk by  
enemy warships. Ten steamers, of  
13,927 tons were sunk by mines.  
One steamer of 2,131 tons was sunk  
either by an enemy warship or a  
mine. Forty-three lives were lost in  
the case of the steamers sunk by war-  
ships and 81 in steamers sunk by  
mines.

#### British Warcraft Wreck Smyrna Fort

LONDON, April 4.—Forts St.  
George and Sanjak, as well as the  
other coastal defences of Smyrna,  
re destroyed Friday in a three-  
hours' bombardment by a British  
warship, says a despatch to The  
Times from Salonica. The Turks did  
not reply to the fire of the warship.

Sanjak is the chief work com-  
manding the entrance to Smyrna har-  
bor. St. George is about three miles  
to the south-east.

#### How's This?

We offer One Hundred Dollars Reward for  
any case of catarrh that cannot be cured by  
Hall's Catarrh Cure.

Hall's Catarrh Cure has been taken by  
catarrh sufferers for the past thirty-five years,  
and has become known as the most reliable  
remedy for catarrh. Hall's Catarrh Cure acts  
thru the Blood on the Mucous surfaces, expel-  
ling the Poison from the Blood and healing the  
diseased portions.

After you have taken Hall's Catarrh Cure for  
a short time you will see a great improvement  
in your general health. Start taking Hall's  
Catarrh Cure at once and get rid of catarrh.  
Send for testimonials, free.

Sold by all Druggists, 75c.

a woman tram conductor had a leg  
blown off. Several houses were  
wrecked in one street. One house  
was completely wrecked, but the  
family of five managed to scramble  
out without serious injury.

As some compensation for this sac-  
rifice of life, however, the British  
public finds satisfaction in practical  
proof afforded of a great improve-  
ment in the defensive methods of  
dealing with aerial incursions. For  
the first time since the inception of  
this method of warfare on the British  
coast not only has one raiding Zep-  
ppelin been brought down and its  
crew taken prisoner, but the official  
report recounts an exciting aerial  
fight between a Zeppelin and a Brit-  
ish airman, Lieut. Brandon, who,  
mounting to a height of 9,000 feet,  
got over the raider and dropped sev-  
eral bombs on it with effect. There  
is doubt about the fate of the enemy  
craft.

The L-15 was surrounded by  
British craft when brought down in  
the Thames estuary, and did not have  
much time to escape, according to a  
young lieutenant of the British aero-  
planes. "First we sighted two Zep-  
pelin," he said. "They were fol-  
lowed closely by three others, all  
flying at about 10,000 feet toward  
the south-east coast. We signaled  
the land batteries and got out of the  
zone of fire ourselves.

"Three of the Zeppelins received  
terrible punishment. We saw one  
distinctly drop its tail and shoot up-  
wards. One of the balloons had  
caught fire, and the commander,  
turning off his light, sent the airship  
upwards until it disappeared from  
view. Then Brandon flew over one  
of the Zeppelins and dropped sev-  
eral bombs, which did not appear to  
take effect. But making a swift dive  
closer he dropped three more bombs  
and believes he broke the Zeppelin's  
back, as the craft swiftly dropped to  
the water.

"I cannot be sure whether the air-  
ship fell or the commander was able  
to let her down. We immediately  
signaled the destroyers and patrols,  
and got within two hundred yards  
of the derelict, ready to finish her  
with bombs if necessary. But she  
surrendered as our ships came up.

#### Facts About the Sun.

Scientists estimate the volume or  
size of the sun at more than 1,000,000  
times that of the earth. Its mass at  
more than 300,000 times and its densi-  
ty about 50 per cent more than water,  
but they have not attempted to express  
its weight in figures. They estimate  
that the attraction of gravitation alone  
at the surface of the sun is twenty-  
seven times that of the earth, so that  
a 200 pound man on the earth would  
weigh more than 5,000 pounds at the  
sun, provided he could stand the tem-  
perature long enough to be weighed.

#### Bobwhite.

The male quail, or bobwhite, de-  
serves honorable mention among gal-  
linaceous birds because he is particu-  
larly good to his wife. He always  
helps her to hatch her eggs and if any-  
thing keeps her away will take the  
whole duty on himself.

#### Disaster.

Knicker—Were you caught in the  
storm without your umbrella? Bocker—Worse still; I was caught without  
any one else's umbrella.

No man is a good physician who  
never been sick.—Arabian.

us rival, Maperson, made out a con-  
tract, and Albani signed it. Mr. Gye  
then told her that he was not Colonel  
Maperson, but that he could do much  
better by her. He offered to tear up  
the contract if she liked, but told her  
that Nilsson was singing at Her Maj-  
esty's and would brook no rival.

Albani decided to let the contract  
stand and thus became one of the stars  
of Covent Garden, eventually marrying  
the son of Mr. Gye.—Westminster Ga-  
zette.

#### Sandwiches For Whist Parties.

Celery Sandwiches.—Mix a cupful of  
finely chopped celery, a quarter cupful of  
chopped nuts and a quarter cupful of  
chopped olives (if liked), moisten  
with salad dressing and spread on thin  
slices of brown bread.

Jelly Sandwiches.—Spread buttered  
graham bread with jelly and sprinkle  
jelly with chopped nuts, cover with  
white bread and shape.

Rolled Bread.—Cut fresh bread while  
still warm in as thin slices as possible.  
Spread evenly with butter which has  
been creamed. Roll slices separately  
and tie each with baby ribbon.

Bread and Butter Folds.—Remove end  
slice from bread, cut off as thin slices  
as possible. Remove crusts, butter each  
slice and put thin slice of entire wheat  
bread or brown bread between two  
white ones. Cut in squares, oblongs,  
circles or triangles. Shapes of hearts,  
spades, clubs and diamonds might be  
used for sandwiches.

#### One of Its Uses.

"Willie, did you see my new shaving  
brush?"

"Yep. Mom is using it to paint the  
bird cage."

The word "tomorrow" was invented  
for irresponsible people and for children.—  
Turgenieff.

#### COMPLETE BLOCKADE LIKELY.

#### Suspension of Rule 19 of Declaration of London Causes Stir.

LONDON, April 4.—A great stir  
has been caused in Scandinavia by  
the report that Great Britain has  
decided to suspend Section 19 of the  
Declaration of London, according to  
the Copenhagen correspondent of the  
Exchange Telegraph Company. The  
general opinion is that the decision is  
attributable to a determination to  
prosecute the blockade of Germany  
with more rigor.

Some newspapers suggest the sus-  
pension is possibly a preliminary to  
a formal announcement of a complete  
blockade, which may have been de-  
cided upon at the Paris conference of  
the Entente allies.

Great Britain issued an order-in-  
Council March 30, which declared  
that "neither a vessel nor her cargo  
shall be immune from capture for a  
breach of blockade upon the sole  
ground that she at the moment is on  
her way to a non-blockaded port." This  
is in contravention to Section 19  
of the Declaration of London, which  
declared neither a vessel nor her  
cargo on the way to a non-blockaded  
port could be captured.

#### Aurora at Port Chalmers, N.Z.

PORT CHALMERS, N.Z., via Lon-  
don, April 3.—The Shackleton Anti-  
arctic auxiliary exploration ship  
Aurora has arrived here. All on  
board the ship are well, except two  
members of the crew who are suffer-  
ing from a minor illness.

# FORCASTING THE POLICY OF THE BORDEN GOVERNMENT

The discussion in committee on Finance Minister White's budget resolutions serves to emphasize the fact that the business tax which is the chief feature of this year's imposts is a temporary measure and not intended to endure beyond December, 1917. After that taxation will be spread more generally over the public. To use Sir Thomas' own words: "The trend of legislation is toward land tax and income tax."

This gives a fair clue to what the Borden Government proposes to do if it should be returned to power at the next general election. "Mobilizing wealth," which they have dwelt on as a feature of their business tax, is not their permanent policy. Their permanent policy, whatever it may be, is likely to develop more quickly than their permanent policy in regard to a Canadian navy which has not been divulged to this day. The permanent taxation policy is quite another kettle of fish. It is not the Borden Government's plan to keep its friends on tenderhooks too long and it's a safe bet that the permanent taxation policy will not lag long on the heels of a Conservative victory in 1917. What that policy will be Sir Thomas has faintly foreshadowed. The Borden Government feels, as Conservative governments always do feel, that the highest function of the common people is their ability to pay taxes. They look on the people as producers—producers of the coin of the realm—broadly speaking that is what their slogan "production" means. Their idea is that when you want a lot of money you've got to go to the plain people for it. The rich people are too few to bear more than a small part of the burden.

Of course when Sir Thomas hinted that the trend of legislation was toward income tax and land tax he didn't indicate how far the trend was going to take him but one may be fairly certain that it will be far enough to cover the interest on the tremendous war debt that is being piled up at the rate of fifteen million dollars a month. It is conceivable that the Government of Canada will be reaching for incomes as low as five hundred dollars a year and be shaking down grocery clerks and servant girls for all the traffic will bear.

The farmers' modest return will probably come within their eagle glance and as for the city dweller who already has the privilege of paying income tax to the municipality, he will have the pleasure of doing it all over again for the powers that be at Ottawa. Many worthy citizens will chide at this double blessing. Many may even point out that war-ridden England doesn't work the golden goose twice in the same place—over there the "rates" go to the municipality and the taxes, including income tax, go to the state—but their grumblings won't cut much figure. They will be told that this is Canada, not England, and that the Borden Government needs the money. They have them, so to speak, going and coming.

practise. Coal oil, which is the poor man's illuminant, got another boost and apples became seven per cent more valuable. When Solomon said "Comfort me with apples for I am sick of love," he spoke like a rich man or else he didn't have any idea what the Canadian tariff was going to do with his favorite fruit. Rumor has it that the apple tariff was framed to help the British Columbia apple, that the Eastern apple growers didn't want it at all. But whatever was the reason the fact remains that Canadian apples grown on our own soil are about twice as dear as tropical fruits imported from the West Indies. Select Canadian apples cost now from two to three cents apiece. The apple is no longer the popular Canadian fruit, the West Indian banana has taken its place. Our apples either go abroad or rot on the ground. Twenty years ago any poor man could have a bin of winter apples in his cellar. Now, although there are perhaps a hundred times as many apples in Canada as there were twenty years ago, they are counted as luxuries, and put in the same class as California oranges. Moreover it isn't the farmer that gets the enhanced price of the apple. It's the transportation companies and the middleman.

As sure, says the proverb, as death and taxes. Well some time or other the Grim Reaper may get Colonel J. Wesley Allison, but meanwhile war taxes bear lightly on Sir Sam's dear friend. I used the word "Dear" advisedly meaning expensive to Canada. The Colonel ships his United States purchases for Britain, Russia, France and the rest by way of Canada and the Customs bars are lifted for him. As a resident of New York he pays nothing to Canada for this privilege, not one cent out of his large court, missions as a war tax to the country he makes use of for his business of army contractor. He is, perhaps, the greatest profiteer of the lot and he goes scot free.

It's taxes here and taxes there, forever and a day. But it's special trains for Allison, he goes scot free.

## OUR UNRULY SUN.

### It Seems to Be Trying to Dilate to the Bursting Point.

The French astronomer Puisseux has been busying himself with the constitution of the sun. He finds that, instead of condensing and shrinking little by little, as was formerly supposed, the sun is constantly dilating more and more and reaching the point of bursting. And if the sun blew up there would be no more need for us poor mortals to worry about worldly affairs.

Big suns every whit as important in their own constellations as ours are frequently victims of an explosion. There was one in the constellation of Perseus early in 1901, and since then two at least have occurred in other celestial groups.

Observation has shown long since that the great orb which is our all in all is a most uncertain character. Sun spots, fire blasts and such like phenomena are by no means the most of which he is capable. The manner in which the sun throws off atomic energy and transforms the heavy into light elements, hydrogen, helium, nebulium, archonium and what not spells nothing good for this world, and a mere nothing might lead to a disaster any day.

## BOTTLING AN EGG.

### Easy Trick That Makes Plain Some Principles of Physics.

If you place an egg on the neck of a carafe almost any one would say that it is impossible to put the egg into the carafe whole. Yet it can be done, and at the same time an important principle in air pressure can be proved.

First have the egg boiled hard and then peel it. Make a torch of folded paper, light and push it into the carafe. After it has burned almost out place the egg on the neck of the carafe, small end downward, so that it acts as a stopper. But be sure you do not push it at all.

The heat of the burning paper has by this time driven much of the air out of the carafe and heated what remains inside. When it has finally burned out the carafe will begin to cool, the air in it becomes cooler and therefore takes up much less space. The pressure of the atmospheric air outside of the bottle is exerted upon the egg, which lengthens out gradually and at last drops into the carafe with a loud "plump."

In this way several important points in physics are made plain. First it is seen how heat rarifies the air and when the air in the carafe cools creates a partial vacuum. Then is proved the fact of atmospheric pressure by the way in which the egg acts. At last we see the egg forced into the carafe, so that the air from without may fill the vacant spaces.—Exchange.

## MODERN GREEKS.

### They Show Little of the Grace of Their Famous Ancestors.

Against the background of antiquity it is easy to project the ties of sentiment which bind the life of the Greek of today to that of the classic worthies from whom he claims direct descent, and it was with only a slight shock that I learned that the man who brought me my morning coffee at the legation bore the tremendous name of Themistocles. And yet it is difficult to visualize the modern Athenian with those who once walked his streets.

Thinking of Homer, of Praxiteles and of Phidias, one looks for Helen, for Hermes and for Athene, but the only Helen I ever saw in Athens was an American girl, married to a member of the cabinet and whose golden hair, blue eyes and classic features made her at once the reigning hostess in the city. And it is only in the islands or deep in the country, where the Albanian flood which swept across the Atlantic plain has never reached, that one finds the facial lineaments and the bodily grace which the ancient sculptor has taught the modern world as being common to all Greeks of classic time.

This survival persists chiefly among the children, because incessant toil and scanty nourishment soon deprive both boys and girls of their native grace and stamp them with the ineradicable marks of a life of labor.

### The Poor.

We all love the poor. It would be entirely unnecessary, if not positively caddish, to say that we hate the poor. But there are two kinds of poor—the individual poor and the collective poor. It is not the individual poor that we

## DOMESTIC BLISS.

### Shown In the Confessions of a Married Man.

It takes my wife a long time to anything. I skin whole pages. She hates to be read alone.

When we travel I always take her in advance the car we are to use. She agrees, but will suddenly change her mind and insist upon taking one. I grumble to myself. She likes the top of the auto, I like the bottom. It remains up.

I always praise her golf, how badly she plays. She always recites mine, no matter how bad they are. When I criticise any does I don't say it; I think sometimes makes trouble enough.

I compliment her occasionally, others. She pretends that she doesn't understand why I do it.

When I buy a new suit she admits that she admires it, is worn out. Then she says one isn't half so becoming as another. When she gets a new gown it intensely until it is about to replace it with another. I liked any hat that I have ever seen. I like every one of hers—on paper.

I laugh at her when she is serious. When I get too serious, she scolds me.

I keep her informed about news only when she asks me. Her asks me, so you know the

I tell her a funny story even if I have two I keep one for day. Sometimes she laughs.

She asks me occasionally if her hair is as long as it was. Tell her it is longer.

I hate bridge, dinner parties and the opera. She respects them and makes me do them.

She makes out checks and to enter them on the stubs time I catch her in this, she reminds me of the celebrated when I left the tickets to a later party in my other suit.

She always keeps her temper, I lose mine. I keep mine, loses hers.

I once told her she was spoiled. She kissed me and knew it.

### Mescal Buttons.

The "sacred mushroom" of the Aztecs, which was called by the name of mescal and used as an intoxicating drink, appears, not a mushroom, but a narcotic cactus Lophophora. It is now well known for its use by South American Indians in ceremonies. It is popularly known as "mescal button," though it is not a mushroom. Early writers of described it as a mushroom, notion as to its botanical name survives. The mistake is in fact that in one of the two forms in which it is prepared the plant is cut off transversely when dried it bears a close resemblance to a mushroom.

### Secret of Perpetual Youth.

"Fall in love, sleep well, falling in love if you wish to be young," said Dr. Josiah Oldfield, in the course of one of his lectures "Secret of Perpetual Youth."

They will be told that this is Canada, not England, and that the Borden Government needs the money. They have them, so to speak, going and coming.

As for the land tax which Sir Thomas so delicately foreshadowed the chances are that the big land-grabbing companies will get off lightly on the plea that their lands are unimproved and that the small holder will be squeezed to the limit. Here is where the householder, in Toronto for example, is due to begin groaning. He pays taxes to the city now on a seventy per cent valuation, he pays a mill on the dollar to the Province of Ontario, and ere long he will have the honor of handing over to the Ottawa government anything he happens to have left. In other words he came across three times and if he holds back a nickel they'll turn the search light on him. The Ontario farmer is in similar plight. He pays three times too. For the last year he has been paying Mr. McCurry's tax of a mill on the dollar on land by which tax the astute Provincial Treasurer has raised two million dollars already and which he therefore proposes to continue at least for another year, simply because the taxing is good. After a great deal of prodding from the newspapers on both sides of politics the Ontario Government parted with a quarter of that two millions for a Canadian soldier's hospital in England but they are still sitting on the other million and a half. Building up a surplus, no doubt, out of an already overtaxed people. If they don't spend it what else than a surplus do they keep it for. And by the same token what do they want another two million dollars for when they haven't been able to get rid of what they have already collected?

The Ontario special land tax is introduced here simply to show how highly Conservative statesmen think of it as a revenue producer. Sir Thomas White has his eye on it too. He realizes quite as well as Tom McGarry that all wealth comes from the land and the provinces can't expect to monopolize a gold mine like that forever. If there is anything in the British North America Act that prevents the Borden Government from getting a look in on a land tax so much the worse for the British North America Act. The thing has been amended once already to give the Borden Government time to breathe. It can be amended again to give them money to breathe with.

Meanwhile the people are being accustomed one way and another to new burdens—trained, as it were, to carry a deck load. Last session saw everything they buy from England raised five per cent and everything they buy in Canada raised another seven per cent besides a lot of special war taxes intended to teach them endurance. The tax on postage stamps, thirty-three and a third per cent, is a direct tax and is paid without a murmur. Taxes on commercial paper, patent medicines, railway and steamboat tickets and so on are indirect taxes which have been blithely shifted by the interests concerned to the ultimate consumer. In the long run the people pay all the taxes—don't make any mistake about that. Even the business tax will come out of their pockets—it will be included in the price of the product.

Not to let the people forget that they've got to do their bit and everybody else's Finance Minister White gave the tariff another little twist this session just to keep himself in

which the sun throws off atomic energy and transforms the heavy into light elements, hydrogen, helium, nebulium, archonium and what not spells nothing good for this world, and a mere nothing might lead to a disaster any day.

In short, it is bound to come at some time or other. Unfortunately science can give us no idea as to when. Centuries and even hundreds of centuries are as but a moment in the history of the universe, says Professor Flammarion, and for all we know the sun may have millions of years more life before it. No man can tell, though, and just as the strongest of us are struck down in a moment, so the all powerful planet may give out at any time, and when it does it will make but short work of all of us here below.

#### Protecting Open Face Watch.

Some years ago I read in a sportsman's journal a good way to protect an open face watch from wet. This also helps to keep it from falling out of a pocket. "To keep one's watch dry, even though you go overboard, take a piece of pure rubber dental dam eight inches square, put the watch in the center and bring the rubber together at the stem, tying the puckered up rubber with a bit of string. When you wish to see the face simply stretch the rubber over the front and you can see the hands clearly through it."

#### Artillery of Antiquity.

"Engines to shoot great stones" were no doubt the progenitors of the "catapult" of Greek and Roman times and the devices in use today for hurling "hand grenades." In a recent visit to the island of Rhodes I was amazed at the great number of stone balls in the edge of the sea, among the ancient towers and battlements and indeed all over the island. They ranged in size from five inches in diameter to more than two feet, and the largest must have weighed at least a ton. The smashing power of such a mass must have been very great. Such stones are found about the walls of Constantinople and other cities of the orient

#### Bullock Skin Boats.

There are few more primitive methods of transportation than those in use today by natives of northern India who make their homes in the vicinity of the swift flowing Sutlej. The boats of these aborigines are nothing more or less than bullock skins inflated by the breath of the natives themselves. Two natives may be seen hard at work filling the skins with air. Having inflated them to their satisfaction, they will leap overboard and paddle themselves across the river, great skill and strength being necessary to sustain their equilibrium during the passage. But even should the boats overturn they are easily righted, and the natives are without exception expert swimmers.

#### Kidney Stew.

Cut kidney in small pieces, rejecting tubes and hard portion; blanch, then cook until tender, adding one onion finely minced. When tender thicken gravy slightly with two tablespoonfuls of butter rolled in two tablespoonfuls of flour; add one tablespoonful of finely minced parsley. Place a border of mashed potatoes around the dish and fill the kidney in the center.

entirely unnecessary, if not positively caddish, to say that we hate the poor. But there are two kinds of poor—the individual poor and the collective poor. It is not the individual poor that we love; it is the collective poor. It is not the poor that we know and see, but the poor that we do not know and have neither time nor inclination to look at. We are afraid if we see them we shall cease to love them. We never say, "God bless the coal heaver or the motorman." For them we find our execrations for not contributing to our comfort just so and so and so.

It is with great fervor, however, that we can say, "God bless the poor," because the poor do not interfere with our comfort to the slightest degree.

#### Life in a Nutshell.

"Stop, look, listen."

A reflective man was reading this railroad sign.

"Those three words illustrate the whole scheme of life," said he.

"How so?"

"You see a pretty girl. You stop. You look. After you marry her you listen."

#### The Attraction.

Miss Sassy—What do you want that shopworn old nobleman for? There's nothing to him.

Miss Bargain—Well, he's been on the market so long I can get his title cheap.

#### Exchange of Compliments.

Maud—My mamma says she can remember when your mamma kept a grocer's shop.

Marie—My mamma says she can remember how much your mamma owes her for groceries.

#### Man and Woman.

When a man gets into trouble the first thing he thinks of is, "How shall I get out of this fix?" When a woman gets into trouble her first thought is, "How shall I best bear this misery?"—Winifred Black.

#### What She Has.

"I have many splendid theories on the art of bringing up children."

"Have you, indeed?" said she. "I have no theories."

"No theories on the proper way of training little ones?"

"No theories," was the reply. "Just three children."

#### Showing His Ignorance.

"What on earth are you doing?" demanded the indignant dining car conductor of the novice waiter, "serving soup on a straight track? Why don't you wait till we strike a curve? You don't know the first principles of railroading."

#### Those Small Berths.

Fat Passenger—There is no danger that any one will pry into these berths, is there? Pullman Porter—Lan' sakes, no, mam. On de contrary, we generally has to pry folks out of dem

Economy is half the battle of life. It is not so hard to earn money as to spend it well.

"...fall in love and keep falling in love if you wish young," said Dr. Josiah Olds, course of one of his lecture "Secret of Perpetual Youth."

"There is nothing more than this to prevent men from growing old."

"If you are married all you do is to fall in love all over your husband or your wife. This you will never find time the nagging habit, and not like matrimonial nagging, not know how to fall in love practice until you learn, and have learned, then you again."

#### For a Mere Song.

Many composers, like Coleridge, have missed the just to their labor, but there is an to the picture. Sullivan received 300 in royalties for "The Lady in Old Madrid" rewarded with a similar amount, and is said, drew something like line from "My Pretty Jane" Standard.

**An Easy Way to Run Ri**  
When about to send a piece to the laundry a piece of tape should be tied to the ribbon and the latter drawn beading, leaving the tape in. The knot is then fastened, a grie can be sent to the was bon being replaced on its retactly the same manner.

#### FORM OF THE EA

**It Has Changed but Very Many Millions of Years**

The earth's form is that rotation period demands. Unless the period has changed, the changed. Given a little time under great pressure flow a

Now, any great slowing down of earth's rotation period within times would be expected in the surface features. The should have wrinkled, so to the equatorial regions and in the polar regions if it changed from a spheroid that considerably flatter than it now present form. Mountains, as of the folding of the rock should exist in profusion in zone and be scarce in or above the higher latitudes of the ea

Such differential effects do and it seems to follow that the earth's rotation period a form could have been only in the stratification of our rock progress. Geologists estimate deposition of denudation and that the formation of strata has consumed from to 100,000,000 years.

If the earth had substance present form 80,000,000 years are safe in saying that the time represented in the build the earth from a small nucleus present dimensions has been longer, probably reckoned in sands of millions of years. Campbell in Scientific Month

## FOODS THE TURKS EAT.

Pilaff is the National Dish, and but Little Meat is Used.

Vegetables, fruits and grains are the staples of the Turkish kitchen. Breakfast on the Bosphorus consists of a small cup of Turkish coffee and a roll. At noon there is a bowl of sour milk (yogurt) and bread. Thick Turkish coffee is taken again in the afternoon to key up appetites for the principal meal, which comes at night. This meal includes, probably, pilaff (meat and rice), several kinds of vegetables, pastry and thick coffee. The workman's meal is still more simple—a chunk of bread and an onion or a bunch of grapes.

There are, however, some dishes upon the Turkish bill of fare which the returned westerner never ceases to regret. Pilaff is one. It is a food as national with the Turk as the potato with the Irish, as the cabbage with the German. It takes a multitude of forms, but its basic quality, its quality of being pilaff, is derived from rice being cooked in such a way as to preserve each grain firm and distinct. The rice is unpolished and in cooking takes on a gelatinous coat. Sometimes it is boiled in mutton fat, a rich, smooth, inviting dish. Sometimes bits of roast mutton are mingled with it, when it becomes a meat pudding of delicious flavor. It is cooked with small currants and pine nuts, fragrant and spicy. It is stuffed with dates and flavored with orange peel; but, whatever its form, it is one of the treasured memories of a visit to the near east.

Eggplant is the foundation of another favored Turkish dish. It is stuffed with chopped onions and rice and cooked in oil. It is also stuffed with meat marrows and rice and steamed until it becomes a culinary inspiration. The westerner, furthermore, learns to enjoy many of the milk foods prepared by the Turks. Yaourt, cultured milk as thick as sour cream, prepared from the rich milk of the buffalo cow, is a satisfaction to the most pampered dinner. Chicken breast milk, made from grated chicken breasts, jelly-like rice milk, starchy pudding, eaten with sugar and rosewater, and yaourt, with chopped nutmeats, are other dishes.

The Turks are fond of sweets. They prepare a kind of bread which they soak in honey and eat with rich cream. They also prepare pastry in strings soaked in honey. Meats, with the exception of mutton, are poor in Turkey, but then the Turk is a good deal of a vegetarian.

The Turkish porter, or hamal, dines on a chunk of bread costing a cent, together with a melon or a bunch of grapes or an onion or a piece of cheese, to the cost of another cent, and considers his meal complete. Yet his daily toil consists in carrying packing cases, pianos and other knickknacks around on his back to the astonishment of every visitor acquainted only with the prowess of porters in the west. This rugged Turkish burden bearer eats a dinner at night which costs about 4 cents—a bowl of pilaff with bits of meat in it.—National Geographic Society Bulletin.

## In an Australian Sleeping Car.

The sleeping cars of Australia are in many ways better than those of the United States. Instead of being of

## THE MARKETS

CHICAGO, April 3.—Wheat ran up 5¢ a bushel in value today, chiefly because of predictions that the domestic winter crop this season would be 165,000,000 bushels less than the yield in 1915. The market closed strong, 4 1/4c to 4 3/4c net higher, with May at \$1.20 1/4 and July \$1.19 1/4. Corn gained 1/4c to 1c and oats 1/4c to 1 1/4c. In provisions the outcome varied from the same as Saturday's finish to 10c higher.

WINNIPEG GRAIN MARKET.

WINNIPEG, April 3.—Wheat closed up 4 1/4c for May and July and 3 1/4c up

for October on the local grain exchange today. Oats were 1/2c higher for both months. Barley was up 1 1/2c and flax 1c better for May and 1/2c better for July.

There was very little fluctuation in the prices, the rise being fairly steady all day. In the local market there was a considerable amount of the wheat sold

credited to the farmers and the sudden rise owed quite a lot to the renewal of outside speculative interest.

Open. High. Low. Close.

Wheat—May ..... 116 119 116 119 1/2

July ..... 117 1/2 120 1/2 117 1/2 120 1/2

Flax—May ..... 196 1/2

MONTREAL GRAIN MARKET.

MONTREAL, April 3.—Cables on Manitoba spring wheat were strong at an advance of 1s per quarter, but owing to the rise in prices here no business resulted. The local market for oats was stronger and prices ruled 1/4c to 1c per bushel higher. Flour was stronger. Millfeed was active and firm.

ELDERLY WOMEN  
SAFEGUARDED

Tell Others How They Were  
Carried Safely Through  
Change of Life.

Durand, Wis.—"I am the mother of fourteen children and I owe my life to

Lydia E. Pinkham's Vegetable Compound. When I was 45 and had the Change of Life, a friend recommended it and it gave me such relief from my bad feelings that I took several bottles. I am now well and healthy and recom- mend your Compound to other ladies."

—Mrs. MARY RIDGWAY, Durand, Wis.

A Massachusetts Woman Writes:

Blackstone, Mass.—"My troubles were from my age, and I felt awfully sick for three years. I had hot flashes often and frequently suffered from pains. I took Lydia E. Pinkham's Vegetable Compound and now am well." —Mrs. PIERRE COURNOYER, Box 239, Blackstone, Mass.

Such warning symptoms as sense of suffocation, hot flashes, headaches, back-aches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness, should be heeded by middle-aged women. Lydia E. Pinkham's Vegetable Compound has carried many women safely through this crisis.

## PHYSICAL CULTURE.

A Factor in Training the Brain in Boys and Girls.

Enthusiasm, self confidence, the spirit of adventure, alertness, promptness, unselfishness, quick judgment, are all to be learned on the field of games and sports, says the Medical Record, and every argument for such training of boys applies with equal force to girls. Mothers as well as fathers must be strong and healthy, and it is said that girls undergoing such training not only assume a more upright and dignified carriage, but begin unconsciously to avoid slang and other vulgarities.

The ancient Greeks knew these things, and in 2,500 years we have not equaled their results. If a boy does not seem to pick up music with ease, or sword play, he may attain remarkable dexterity with tools. At best he may learn to carve, at least he may attain creditable efficiency as a joiner or carpenter. Even juggling and conjuring train certain brain centers of value to the organism and are much better than no manual work at all. Personally, continues the editor, we think very highly of military drill, which trains every fiber of the body, down to the very finger tips and the tiny muscles of the eye, besides inculcating invaluable habits of prompt obedience, team work, respect for efficient author-ity, etc.

earth had substantially its form 80,000,000 years ago we are saying that the period of in the building up of from a small nucleus to its dimensions has been vastly probably reckoned in the thousands of years.—W. W. in Scientific Monthly.

#### In an Australian Sleeping Car.

The sleeping cars of Australia are in many ways better than those of the United States. Instead of being of continuous length they are broken up into compartments, each one of which contains two berths running crosswise the track, a separate lavatory and divers shelves, racks, hooks and cubby holes for disposing of a traveler's belongings. The privacy of the arrangement is much to my mind. The porter, who is also the conductor, takes charge of all heavy bags, satchels and packages and puts them in an apartment specially reserved for that purpose.

#### A Varnishing Tip.

When varnishing wood the work must be done in a warm room at a temperature of at least 75 degrees F. At a lower temperature the moisture in the air will give a milky and cloudy appearance to the varnish. On the other hand, at the higher temperature the moisture is not precipitated until the alcohol of the varnish has sufficiently evaporated to leave a thin smooth film of shellac. The durability and gloss are dependent on this.

#### Tall English Authors.

Inches would seem not to lack significance in literature. Of the great English writers of the Victorian era almost all were tall. Tennyson, Carlyle, Edward Fitzgerald and Matthew Arnold all reached six feet, Ruskin touched five feet ten, Froude five feet eleven, Dickens and Browning fell short of the six foot level by only a narrow space, and Thackeray turned six feet three.—London Chronicle.

#### An Anachronism.

When some celebrated pictures of Adam and Eve were seen on exhibition Mr. McNab was taken to see them. "I think no great things of the painter," said the gardener. "Why, man, tempting Adam w' a pippin of a variety that wasn't known until about twenty years ago!"

#### Squared.

"By George, Tom, you have been in a fight!"

"No; I just met an old school chum of mine I used to like when we were kids, and he paid me a debt he's been owing me a long time."

#### Handicapped.

"Jinks is a born poet." "That's no reason why he shouldn't try to make something of himself."

Of all poverty that of the mind is the most deplorable.

#### A Queer Thing About July.

How we came to pronounce July as we do now with the accent on the second syllable is one of the unsolved mysteries of speech. Named, of course, after Julius Caesar, it should really be pronounced to rhyme with "duly," and so our forefathers actually did pronounce it. Spenser, for instance, has the line, "Then came hot July boiling like to fire," and even so late as Johnson's time the accent was still on the "Ju." It is one of many words which would startle those ancestors of ours, spoken as we speak them now.—London Telegraph.

## CATTLE MARKETS

### UNION STOCK YARDS.

TORONTO, April 3.—Receipts of live stock at the Union Yards were 2,251 cattle, 468 hogs, 43 sheep, and 94 calves.

#### Butchers' Cattle.

Choice heavy steers at \$8.40 to \$8.60; choice butchers' cattle at \$8.15 to \$8.35; good butchers, \$7.85 to \$8.10; medium butchers, \$7.60 to \$7.85; common butchers, \$6.75 to \$7; choice cows, \$6.75 to \$7; good cows, \$6.25 to \$6.50; medium cows, \$5.50 to \$5.85; common cows, \$5 to \$5.50; choice bulls, \$7 to \$7.25; good bulls, \$6.50 to \$6.75; common bulls, \$5.25 to \$6.

#### Stockers and Feeders.

Feeders, \$50 to 1000 lbs., sold at \$7.25 to \$7.60; stockers, 650 to 750 lbs., \$6.75 to \$7, and for a few choice quality horned yearlings, \$7.25 was paid.

#### Milkers and Springers.

Choice milkers and springers at \$85 to \$90; good cows at \$65 to \$75; common cows at \$50 to \$60.

#### Veal Calves.

Choice veal calves, \$9 to \$10; good calves, \$8.50 to \$9; medium, \$7.50 to \$8; common, \$4.50 to \$6; heavy fat calves, \$6 to \$7.

#### Sheep and Lambs.

Light sheep sold at \$9 to \$9.50; heavy sheep at \$7 to \$8; ewes at \$6 to \$6.50; choice lambs at \$11.50 to \$12.50; full lambs at \$9 to \$10; spring lambs, \$8 to \$10 each.

#### Hogs.

Selects, weighed off cars, \$11.25; \$10.75 fed and watered; \$10.40 f.o.b. cars. For heavy, fat, thin, light hogs, 50c per cwt. will be deducted; \$2.50 off for sows; \$4 off for stags from prices paid for selects; half of one per cent. off all hogs for inspection.

#### MONTREAL LIVE STOCK.

MONTREAL, April 3.—At the Montreal stock yards, West End Market, prices for steers and heifers today scored an advance of 40c to 50c, and cows and bulls 25c per cwt. Sales of full loads of choice steers and heifers were made at \$8.50 to \$8.65, and small lots of picked as high as \$8.75 to \$9 per cwt.

The strength which has characterized the live hog situation for some weeks now still continues to be the main feature of the prices today for the stock on spot scored another advance of 30c to 35c per cwt.

An active trade was done in selected stock on spot at \$11.65 to \$11.80 and to arrive at \$11.90 to \$12 per cwt. off cars, the highest price ever paid in Canada. Sows sold at \$9.50 to \$10, and stags at \$8.50 to \$9 per cwt.

Lambs were in good volume and demand fair. Sales were made from \$5 to \$8 each. Calves were in good demand at 5c to 7c per pound for milkfed and \$2 to \$4 each for common.

Butchers' cattle, choice, \$8.50 to \$8.70; do. medium, \$7.50 to \$8.25; do. common, \$6 to \$7; cannery, \$4.75 to \$5.50; butchers' cattle, choice cows, \$7 to \$7.25; do. medium, \$6 to \$6.75; do. bulls, \$6.75 to \$8; milkers, choice, each, \$8.50 to \$9; do. common and medium, \$7.50 to \$8.50; springers, \$6.50 to \$7.50; sheep, ewes, \$8 to \$8.50; bucks and ewes, \$7.50 to \$7.75; lambs, \$11.75 to \$12; hogs, f.o.b., \$11.65 to \$12.

#### EAST BUFFALO LIVE STOCK.

EAST BUFFALO, April 3.—Cattle—Receipts, 3250; heavy, slow and lower; others steady; prime steers, \$9.35 to \$9.50; shipping, \$8.25 to \$9.25; butchers, \$7.20 to \$8.80; heifers, \$6.75 to \$8.50; cows, \$4 to \$7.50; bulls, \$5 to \$7.50; stockers and feeders, \$6 to \$7.50; stock heifers, \$6.75 to \$8.50; fresh cows and springers, active and steady, \$50 to \$100.

Veals—Receipts, 1100; active; \$4 to \$10.50.

Hogs—Receipts, 9600; active; heavy and mixed, \$10.25 to \$10.35; workers, \$9.25 to \$10.30; pigs, \$9.25 to \$9.50; roughs, \$9.15 to \$9.25; stags, \$6.50 to \$7.75.

valuable habits of prompt obedience, team work, respect for efficient authority, etc.

#### Harrison's Motion.

Delving in the archives of the Miami Union Literary society of Miami university the other day students found in an old minute book two entries regarding students who afterward became men of national fame. The record of the society's meeting of Nov. 1, 1851, says:

"Benjamin Harrison made the following motion: 'Mr. Chairman, I move that every man who spits tobacco juice on the floor of the society hall be fined 6 cents and that the money thus procured be saved for six months, at the end of which time a spitbox be purchased for this society.'" The minutes of the same society of Jan. 23, 1843, record the fact that Oliver P. Morton was fined 12½ cents for disorderly conduct.

#### A Staggering Estimate.

The late Mr. G. S. Carr, an accomplished mathematician, attempted to give a reply to the query, "How many different games at chess would it be possible to play?" His conclusions are that the total would be given by the one hundredth power of twenty, which is represented by the figure 12, followed by 129 ciphers. If each move be represented by a grain of sand the aforesaid number of grains, if packed around the sun, would fill up all space in every direction to a distance of over two sextillion miles!—London Telegraph.

#### Fielding at Lisbon.

Lisbon contains the grave of Henry Fielding. It was on Oct. 4, 1754, that Fielding died in the Portuguese capital, and it was in 1830 that his tomb was erected in the English cemetery. And Fielding didn't like Lisbon. "As the houses, convents, churches, etc., are large," he wrote, "and all built with white stone, they look beautiful at a distance, but as you approach nearer and find them to want every kind of ornament all idea of beauty vanishes at once." At that time a voyage to Lisbon was an undertaking not lightly to be contemplated. It took Fielding exactly fifty days of foul weather.—St. James' Gazette.

#### Cute Little Girl.

One day while Katherine's mother was ill a cup of beef tea was prepared for her, but Katherine fancied it and drank almost all of it. Her father was about to scold her when her mother said:

"Never mind; it does me just as much good to see her drink it."

Shortly after this a dose of castor oil was prepared for Katherine, and she poured it into her doll's mouth.

"Why, Katherine," said her astonished mother, "what did you do that for?"

"That's all right," Katherine replied, "it will do me just as much good if she drinks it."

(Continued from page 1.)

as soon as possible to cover these overdrafts.

From the sale of the said debenture a refund to the General account has been made of \$1,003.35 to cover items not charged in the overdraft accounts.

Napanee, April 3rd, A.D. 1916.

Sgd. G. F. RUTTAN, Mayor.

Sgd. W. A. GRANGE, Clerk.

Coun. Graham presented the report of the Streets Committee. The accounts of J. G. Fennell, \$6.80, and Jas. Vine, \$5.75 were correct; the account of E. Pringle, \$25.30, was found to be incorrect, the right amount should have been \$22.55. The committee recommended payment of these accounts. They also reported the account of the Township of Richmond \$8.50, as correct, but found that the town had a contra account for \$10.50, for half cost of a job on boundary road in 1913, and recommended that this account be rendered to the Richmond Council.

Report adopted.

Reeve Osborne reported the accounts of the Seymour Power Co., \$1.20, and I. Vanalstine, 25c, referred to the Fire, Water and Light Committee, as correct, and recommended payment.

Report adopted.

Coun. Steacy, Chairman of the Printing and By-Laws Committee, reported that they had redrafted and laid on the table, copies of By-Laws for the regulation of traffic, and for the licensing of liveries, carters and draymen, and recommended that the passing of the by-laws by the council.

Report adopted.

Coun. Ming, Chairman of Market and Police Committee, reported recommending that new guard rails be placed along the edge of the pavement on the market square. The Committee also recommended the purchase of a new uniform for Chief-of-Police Barrett, at a cost not to exceed, \$30.00.

Report adopted.

Coun. Denison, Chairman of Town Property Committee, reported the account of W. J. Jewell, \$4.00, for partitioning a room in the fire hall, as correct and recommended payment.

Report adopted.

Coun. Paul, Chairman of Poor and Sanitary Committee, recommended the payment of \$7.00 to Mr. S. Thompson for care of a Mr. Walker, who had been ill at his home for four weeks. Also that an account of M. B. Judson, 82c, was correct and recommended payment.

Report adopted.

On motion the clerk was instructed to bill the Town of Picton for all expenses incurred in taking care of Mr. Walker and family, who came here, sick, from Picton.

A by-law was passed appointing F. W. Barrett, as Sanitary Inspector for the Town of Napanee, for the year 1916, at a salary of \$50.00 per year.

A by-law regulating traffic upon certain streets of the Town of Napanee was introduced and passed.

A by-law in reference to the licensing of livery stables, carters, draymen etc., was introduced, giving its first reading, and ordered laid on the table. The clerk was instructed to have the have the Traffic By-Law printed in pamphlet form and properly circulated.

## BY-LAW No. 1

### A By-Law to Regulate Traffic in the Streets of Napanee

Passed April 3, 1916

BE IT ENACTED by the Corporation of the Town of Napanee as follows:

1. The word "street" in this by-law shall mean and include all road, street, lane, alley, means of communication; "vehicle" shall mean and include description of conveyance either by horses or propelled by oil or gas and the word "driver" shall include the operator of such vehicle.

2. The driver of every vehicle shall keep to the right and the any heavy, slow moving vehicle shall keep as near to the curb as circumstances and weather permit.

3. The driver of any vehicle shall keep to the right and the driver of a overtaking another vehicle shall do so to the left.

4. The driver of every motor vehicle requiring or desiring to stop or stand on Dundas street or on Centre streets, between Dundas and Centre streets, shall do so on the right side of the vehicle near the curb and as near to the curb as possible.

5. No person shall leave continuously in the highway on Dundas street, between Hobson and Adelphi street, or upon Centre streets, between Dundas and Centre streets, any motor automobile for a longer period than thirty minutes.

6. No person shall turn a motor vehicle between street in within the limits of the street in clause 4 hereof but turns shall be made at the intersections.

7. The driver of every vehicle shall give visible or audible warning i before and whilst turning up and if turning to the right arm to the height of his shoulder and shall keep close to the vehicle and if turning to the left shall his intention so to do to the of the vehicles in the rear his left arm to the height of his shoulder and shall so turn at the centre of the intersection.

8. The driver of every vehicle crossing from one side of the street to the other shall do so by turning to the left so as to head in the direction of the traffic on the street and so as not to cross the left side of the vehicle near the curb.

9. No driver of any vehicle shall stop at or obstruct any street.

10. The driver of every vehicle shall reduce the speed at all street crossings to a safe limit.

11. The driver of every vehicle shall have the right of way over those vehicles going east or west and shall have the right of way over those vehicles going south and the vehicles using the police and fire department in town shall have the right of way.

STONE & WELLINGTON,

TORONTO ONT.

day nights caused greater loss of life than any previous aerial attack this year.

The total casualties for the two nights, according to an official report, were 59 persons killed and 166 wounded, a total of 225.

As some compensation for this sacrifice of life, however, the British public finds satisfaction in practical proof afforded of a great improvement in the defensive methods dealing with aerial incursions. For the first time since the inception of this method of warfare on the British coast, not only has one raiding zeppelin been brought down and its crew taken prisoner, but the official report recounts an exciting aerial fight between a zeppelin and a British airman, Lieut. Brandon, who, mounting to a height of 9,000 feet, got over the raider and dropped several bombs on it with effect.

### BRANDON'S GREAT FEAT.

The machine of Lieut. Brandon was hit several times by machine-gun bullets from the zeppelin. It is still unknown whether the zeppelin in this fight was L-15, which was brought down off the Thames estuary, or another craft which is believed to have dropped its machine gun, petrol tank and other parts.

Alfred Brandon, the British airman, is a native of Wellington, N.Z. He is 32 years of age and only joined the flying corps last July.

There has been constant agitation in the newspapers for British airmen to ascend and attack zeppelins and the fact that this has now been successfully done gives promise of still greater achievements in the same direction. At the same time it will tend to increase public confidence that the authorities are making progress in their efforts to deal with the zeppelin danger.

### Allies' Faith is Unshakable Asquith's Message to Italy

ROME, April 1, via Paris, April 2.—Herbert H. Asquith, the British prime minister, was the guest to-night at a great public reception given at the capital by Prince Prospero Calonna, mayor of Rome. In the course of his speech Mr. Asquith said:

"In this place and in the gravest moment of the world's history, I want to reaffirm the unshakable faith of the allies in the cause of liberty and justice, and to proclaim our irrevocable determination to conquer to protect weaker peoples and also not to tolerate the violation of elementary social laws after centuries of struggle."

The premier sent a "message of faith and affectionate salutation" to the "heroic army of Italy and to the whole Italian people." He reminded his hearers that this was the first time a British premier had been received by "the first citizen of Rome in the capitol—the temple and citadel of the ancient world, the outpost of the world of the middle ages, and now a monument symbolic of the renaissance and the unity of Italy."

After the reception Premier Asquith received a delegation of representatives of the Italian press.

### TENDERS.

Tenders for the different works and supplies needed by the Town of Napanee for the year 1916, were opened, and awarded as follows:

D. Pizzarillo was given the contract for taking care of Harvey Warner Park for 1916 at salary of \$95.00.

There were four tenders for street sprinkling; John Chatterton, John Barrett, Geo. Grieve, Thos. Killorin, all at \$3.50 per day.

Moved by Councillors Graham and Paul that the tender of John Chatterton for No. 1 sprinkler, be accepted. Carried.

Moved by Reeve Osborne, seconded by Coun. Ming, that the tender of Geo. Grieve for the No. 2 sprinkler be accepted.

Moved in amendment by Coun. Graham and Steacy that the tender for Thos. Killorin be accepted.

Amendment lost, original motion carried.

Robert Light's tender for flat and crushed stone was accepted.

The tender of the Point Ann Quarries for crushed stone was placed in the hands of the Streets Committee to report.

The Madole Hardware Co.'s, tender for cement was accepted. Their offer was \$1.70 per barrel at store, or \$1.75 delivered.

The tenders of Boyle & Son and the Madole Hardware Co., for tile was referred to the Streets Committee to report.

On motion the Streets Committee were empowered to have the street sprinklers painted. They were also instructed to procure a price for a new tank for No. 3 sprinkler and report.

The Streets Committee were given power to construct a sewer on Thomas street, beginning at the corner of Adelphi and Thomas streets, and continuing a distance of about 250 feet east, provided the property owners along the route of said sewer were willing to sign an agreement to pay the cost of construction.

The clerk was instructed to render to the Township of North Fredericksburgh, an account for snow shovelling and opening drain amounting to \$1.75.

The time for the tax collector to return his roll was extended until the next meeting of council.

### ACCOUNTS.

The following accounts were ordered paid:

P. Gleeson.....	\$ 25 75
F. E. VanLuven.....	35 75
L. McCabe.....	25
F. W. Barrett.....	1 00
Seymour Power Co.....	272 58
M. C. Bogart.....	14 55
E. J. Pollard.....	35 50
Bell Telephone Co.....	6 25

An account of the Bell Telephone Co., \$1.35, was referred to the Police and Market Committee with power to act: T. W. Simpson, \$2.00, to the Police Committee to report.

Council adjourned.

### Smyrna Forts Wrecked By British Warcraft

LONDON, April 3.—Forts St. George and Sanjak, as well as the other coastal defenses of Smyrna, were destroyed Friday in a three hours' bombardment by a British warship, says a despatch to The Times from Saloniki. The Turks did not reply to the fire of the warship.

Sanjak is the chief work commanding the entrance to Smyrna harbor. St. George is about three miles to the south of

11. The driver of every east or west will have way over those vehicles or south and the vehicles police and fire department shall have the right all other traffic.

12. The driver of every stop when signalled to do police constable.

13. The police officers and of the said town shall have control of the vehicles and traffic in the streets of the and the power to enforce signs of this by-law.

14. ## MINUTES OF RICHMOND COUNCIL.

Selby, April 3rd, 1916.

The Council met at Selby. The members all present. The Reeve presided.

The minutes of the last meeting were read and confirmed.

Several communications were read and considered.

Moved by Mr. Russell, seconded by Mr. Sills, that a grant of \$10.00 be given to the Kingston General Hospital. Carried.

Moved by Mr. Sills, seconded by Mr. Russell, that Byron Story be appointed pathmaster on road Division No. 74, and Daniel Jaynes be pathmaster for road Division No. 83, and the By-law be amended accordingly. Carried.

Moved by Mr. Sills, seconded by Mr. Hartin, that C. N. Lucas be appointed overseer of the Selby weigh scales, at the usual terms. Carried.

Moved by Mr. Bush, seconded by Mr. Hartin, that Patrick Jordan be paid \$10.00 for work on side road, north of R. C. Church. Carried.

Re By-law, closing and diverting parts of road allowance between concessions 7 and 8, and forced road in Lot 14, concession 7, Township of Richmond: Moved by Mr. Bush, seconded by Mr. Hartin, that the Clerk have notices of proposed By-law published for four weeks in the Napanee Express newspaper, and do the necessary work for the Canadian Pacific Railway Company, by the said Company paying far the printing and the work of the Clerk in connection therewith. Carried.

Moved by Mr. Sills, seconded by Mr. Hartin, that the Trustee Board of Empey Hill Church be granted the privilege of extending the platform of the Church on the right of way, with the understanding that they assume all responsibility as regards action for damages, should any occur. Carried.

A By-law was introduced and passed appointing W. A. English, as Township road engineer, at a salary of \$2.00 per day. Carried.

Moved by Mr. Hartin, seconded by Mr. Sills, that the Collector's time be extended to the May session. Carried.

Moved by Mr. Hartin, seconded by Mr. Sills, that the tender of R. J. French be accepted, offering to furnish engine and engineer to operate stone crusher, including man, team, and wagon, wagon and tank, belting and oil, and cutting wood for engine, at the rate of \$6.50 per day of 10 hours. Also will move after hours at the same rate per day, under the supervision of the Township engineer, during the pleasure of the Council of 1916. Carried.

Moved by Mr. Russell, seconded by Mr. Bush, that the following accounts be paid: Archie McNeill, for work on Camden boundary, \$5.00; Archie Graham, for work on Camden boundary, \$2.50; Theodore Windover, account for supplies furnished Richard Lloyd, as aid for the month of March, \$5.33; Peter Hart, for re-pairs on snow plough, \$1.50; Melville Dafoe, as bonus on 10 rods wire fence along road, \$1.00; Mrs. Levi Doney, as aid for the month of April, \$5.00; Christie Thompson, for work on Camden boundary, \$3.00. Carried.

Moved by Mr. Russell, seconded by Mr. Bush, whereas Dr. C. C. James, the Agricultural Commissioner of the Dominion Government, has by a circular dated December 4th, 1915, recommended that the best means of giving laboratory instruction in the sciences underlying farming and practical instruction in soil cultivation, production and handling of crops, and raising and care of live stock, is to have School of Agriculture in connection therewith in several districts of the Province, and

Whereas we believe that there is but one Agricultural College in Ontario undertaking work of this kind, namely in the city of Guelph, and

Whereas there is no Experimental Farm or Agricultural College reasonably convenient to the Agricultural community in the eastern portion of the Province, and

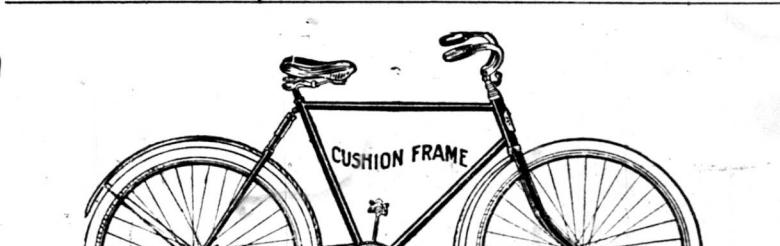

Whereas the district in and about the Town of Napanee is very suitably situated in respect to the extent and variety of soil and is most readily accessible for students for the whole district both east and west of Napanee and also to the north, and

Whereas the Municipal Council of the Township of Richmond is of the opinion that an Experimental Farm and School of Agriculture located at or near the Town of Napanee is very desirable to the purposes set out in the said circular of Dr. James.

Now therefore be it resolved that the Ontario Government be memorialized to locate an Agricultural School at or near the Town of Napanee, and that a copy of this resolution be forwarded to the Hon. the Minister of Agriculture for Ontario, to T. G. Carscallen and W. D. Black, the members respectfully for Lennox and Addington and also a copy to G. B. Curran, the District Representative of the Department of Agriculture for the County of Lennox and Addington. Carried.

Moved and seconded that this Council adjourn to meet on the first Monday in May, at the hour of 10 o'clock, a.m. Carried.

JAMES McKITTRICK,  
Township Clerk.

## A Most Interesting And Descriptive Letter From Ken. Shorey

Cairo, March 1st, 1916.

Dear Father and Mother:

I think the past five days have been the most enjoyable I ever put in, and I want to tell you about them.

On Thursday evening, Feb. 24th, Sgt. Major Crawford, Staff Sgt. Whytook, Sgts. Barnes, Sanger (steward), Barry, (dental) and myself started for Assuan which is about 600 miles south of Cairo.

We had second class tickets but succeeded in staying in first class compartment by backsheeshing the guard with cigars. After a good lunch (which the steward had looked after) we retired as best we could, I managed to find an empty seat in another compartment, on which I spent a very fair night.

At 9.10 on Friday, we arrived at Luxor where we had to change trains for Assuan, the country we saw from daylight till 9 a.m. was much like that around Cairo, with palm trees, wheat, sugar cane and corn as crops also innumerable water wheels and shadoofs or men dipping water out of wells to let it flow over the land.

Just here I might explain how they work. Most of the canals are dry now, as the Nile is low, but by digging holes in the bottom of the canals, water is found, the shadoof works his pail or basket or piece of goat skin by having it tied on the end of a pole; the other end of which is moulded a large lump of clay. The pole is supported somewhere near the middle by a cross piece or two uprights made by standing several pieces of cane together and plastering mud around them. When the pail is full, the weight of the lump of clay serves to lift it up and the water is poured into a hole cut in the bank, only to be taken out of that by another man higher up, there may be three or four relays before the water is to the top and can be poured into the small ditches to run over the

that the side of the car will be in the shade as much as possible. The trip which lasts until five p.m. is the dustiest and hottest I ever took.

On the east there is desert, sand, hills and rocks, while on the west is the green country bordering the river.

At times the road cuts through the desert and again through the green country, but the sand sucks in and everything is covered with dirt.

Instead of getting off at Assuan, we proceeded to Shellal, the end of the railway a few miles south of Assuan. There was no time to lose as it was getting late, so we at once chartered a dahabeh or row boat to take us out to the island Philae or rather over the island for just now it is all under water. This island when uncovered at high Nile is supposed to be the most historic little place in the world, all that can be seen now is part of the temple which sticks out of the water. I will send pictures of everything, so I will not stop here to describe.

After looking around as much as we wished we proceeded with the boat to Assuan dam where we got donkeys and rode back to Assuan itself, a distance of three miles.

Shellal is as near as can be on the tropic of Cancer so we can say that for once at least we were in the tropics.

It is also the end of that line of railway, there is no other railroad until the second cataract is reached, 200 miles further south, there is a train from that point to Kartoum.

We were to start early in the morning to see the dam so we retired early, at 7 a.m. we took donkeys again back over the same road, on the way we stopped at the ancient Assuan quarries from which was taken all the granite for the temples and statues of ancient Egypt, even the stone for the pyramids at Cairo was taken from here. There is an obelisk all smoothed on three sides and 90 feet long half buried in the sand.

There is supposed to have been a canal from the quarries to the Nile in ancient times. The dam, 14 miles long, is the largest in the world, it raises the water behind it 88 feet and affects the level of the river 140 miles back. This is the manner in which the supply of water is managed.

told us he had a dahabeh ready for us to live on instead of going to the hotel, we went to look it over and decided at once to stay on board, I am sending a picture of it. There was room for four below and two on deck, the meals were cooked on board and everything was fine.

Luxor is the site of ancient Thebes, just here the river has a wide valley bounded by high rocky hills, in ancient times the Nile flowed near one line of hills, this left a level place of several square miles for the city.

There was a city of the living where Karuak now is and a city of the dead still called Thebes, the Nile now runs between the two.

Right in the Town of Luxor is the temple of Luxor, built by Rameses II. the Pharaoh of Moses' time. All the ancient temples are, in general, built on the same plan. The entrance is formed of two pylons with the small gate between them, a pylon is a wall of stone of varying height and width in the shape of a wedge, on the outside of the pylons are upright grooves in the stone for flag stones, the wall on both sides has the history of the king, in whose reign it was built, told by pictures and hieroglyphics.

Passing through the gate there is first a court surrounded by a wall, the court is roofed in around the edge with stone slabs supported by pillars. All the walls, roof and pillars are carved and painted with all sorts of things telling of the King's life; of his worship, of hunting and fighting, etc.

Then comes the second pylon opposite the first and a second gate which leads into the Hypostyle hall, this part is entirely covered with a stone roof supported by pillars, painted and carved as usual, in fact, if a stone is seen uncarved you may know that the work was not finished.

This hall opens into a large open court still surrounded by the wall, in which there are usually numerous statues of the King and his family.

This is a description of a simple temple, but nearly everyone has additions in the form of small side temples, or two or three halls or obelisks set up, etc.

In the front of the Luxor temple are three large statues of Rameses II. (there were formerly six) there is also a large obelisk. The pillars or columns are very fine, some of them being 52 feet high, there are 24 granite statues of the king surrounding the court, these are remarkably well done, (I am sending pictures of nearly everything).

On Sunday, 27th, we crossed the river in a dahabeh, took donkeys and set out for the tombs of the Kings, which is one of the sights of the Necropolis or city of the dead.

The road lay for about three miles through the sand and then up a deep valley, the sun was very hot and no breeze reached down between the hills, I suffered from the glare of the sand for the first time.

The tombs have been hewn out of the solid rock, limestone, there are dozens of them nearly all together, each King had one built for himself during his lifetime.

There is a general plan to each tomb which I shall try to describe.

The approach is not on the level but slopes down, this downward slope leads to the entrance to the tomb, as soon as the entrance is crossed the floor of the tomb always slopes down, sometimes there are steps, then there is a room, off of which on each side are two smaller rooms.

### AN ANTI-HYDRO GOV

The Toronto Telegram (the C.N.R. victory over  
Radials in the Railway C  
Ottawa, made a heavy at  
Hearst Government, etc  
the Premier and other me  
Cabinet were anti-Hydro.

The following are quota

poured into a hole cut in the bank, only to be taken out of that by another man higher up, there may be three or four relays before the water is to the top and can be poured into the small ditches to run over the land.

At 10 a.m. we left Luxor for Aswan by rail, the road is a narrow gauge, the cars are all white to reflect the sun and have lattice work hanging half way down the side, so

long, is the largest in the world, it raises the water behind it 88 feet, and affects the level of the river 140 miles back. This is the manner in which the supply of water is managed.

During high Nile the sluices in the dam are all open, letting the water take its natural course.

When the river begins to fall about Dec. 1st, the sluices are shut one after the other until in the dry season all but a few are closed, this accumulated water can be let out as required, so that by the time high Nile comes again all the sluices are open.

It is estimated that by controlling the supply in this way, the crop of Egypt has been multiplied nine times.

The opening and closing of the sluices also explains why the island of Philae is under water in the dry season when the water is dammed back by the closed sluices. We walked out for a long way on the dam and got some snaps.

Our road back to the town lay through a Nubian village with its mud huts and numberless dogs, children, flies, chickens, etc. Out along the hills which line the Nile close below the dam, the scenery is fine and wild, and riding on donkeys along the edge of the hills made it all the more romantic. Arriving at the town we took a boat to a large island opposite the hotel. This is Elephantine Island, on which are several sights, there are the ruins of an old temple hardly worth looking at now, the Nilometre, the oldest in existence, it

was by the height of the water measured on this that the taxes on the land of the fellah was fixed, the Astronomer's well 350 feet deep, now nearly filled with rubbish in which the ancient astronomer's could study the heavens in the daytime.

Assuan itself is not much of a place, the occupation of the population seems to be about equally divided between agriculture and an attempt to exploit any tourists who are unfortunate enough to have too much coin.

There are three or four good hotels, two of which are closed now for everything is very slack this year.

We left Assuan at 10:45 a.m. and after the same hot, dusty ride arrived in Luxor again at 5 p.m. We had a certain guide recommended to us and he met us at the station and

leads to the entrance to the tomb, as soon as the entrance is crossed the floor of the tomb always slopes down, sometimes there are steps, then there is a room, off of which on each side are two smaller rooms. Out of the large room the floor again descends into another room like the first, this may be the last or the arrangement may be repeated. At all events the body of the King was always placed in the last room, the smaller rooms contained his family.

The walls and ceilings are as smooth as can be and are all painted and decorated.

There is also a general plan in regard to the decoration and writings on the walls, the ceilings are usually painted blue with numberless white stars, making a very pretty design. The history of the King's life is written on the walls, also pictures of him worshipping and offering gifts to various gods, also the trip of his soul after death, and the burial procession. One needs to have a fair idea of Egyptian mythology to appreciate the tombs and my knowledge of it is rather vague.

There are countless gods and goddesses or so it seems for one is always seeing new ones in the pictures on the walls, they are all pictured with a human body but the head of an animal or bird.

Thus there is Anubis, god of the dead (Jackal's head) Canopus, god of the underworld (dog's head) Toth, god of writing (ibis head) Amon, sun god, etc., etc.

Each tomb also has a plan of itself pictured on the walls, and are lighted with electricity so everything can be plainly seen.

The following are the tombs we visited with a note on everything particular about them: Tomb of Sethos I. 1380 B.C., the most beautiful of all; tomb of Amenophis II. 1600 B.C., which has the mummy of the king still lying in the sarcophagus in the last room of the tomb, there are also three other mummies in one of the side rooms but nobody knows who they are. The tomb of Ameneptahs, the mummy was never found in this tomb but the sarcophagus is there and a huge granite cover for it.

The next in order was the temple of Queen Hatshepsut (Hata-soo) which was on the other side of a spur of the mountain, our donkeys had gone up ahead so we had to climb to the top on foot, the path then lay right along the edge of the cliff, about 150 feet high, the view was fine, behind lay the valley we had just left and ahead the green valley of the Nile, soon the path descended at such an angle that we had to walk but at last we reached the bottom and a few minutes ride brought us to the temple.

We found some shade and ate our lunch before going any farther.

The temple does not conform to the general plan at all, it is more like a tomb and was built by the Queen for that purpose, being mostly subterranean, but she was not buried in it, for some reason or other, her mummy was never found. The pictures and paintings are very interesting, the Queen (as she took a man's place on the throne) is dressed as a man, with a short skirt such as all the kings wear, and a beard, a false one, for it is pictured as being tied up. There is the usual history, sacrifices, battles, funeral processions, etc. The Queen was of the XVIII dynasty, 1600 B.C. To finish the day's sight-seeing we visited the tomb of Memna, a land stewart under King Seli I, 1370 B.C. The scenes on the walls differ from

Ottawa, made a heavy attack Hearst Government, claims the Premier and other members Cabinet were anti-Hydro men. The following are quotations from the Telegram on the subject.

"The more astute observer that the C.N.R. bills were a pretext for a show of strength Sir Adam Beck on the part anti-Beck factions in the Hearst and the Borden Government which had effected a junction.

"In premier Hearst of Ontario to destroy Sir Adam asked an Ottawa observer, Ontario politics are not an of "If not, then why was Minister of power left to alone with the anti-public forces in the Railway Comm Paul with the beasts at Ep

"That the alleged Hearst is shared or inspired by Howard Ferguson and Hon. McGarry is another matter position—unestablished as though yesterday's development some way to confirm it. There certainly no evidence of assistance the Hydro or Sir Adam B. Hon. G. Howard Ferguson."

MR. HANNA AGAIN

Mr. Hanna's alleged co with the Standard Oil Comp again been before the House

Mr. Scott Davidson, M. North Brant, drew the attention of the House to a newspaper telling of a memorandum members of the Canadian Se Mr. P. A. O'Farrel, and the Government of Ontario with "inspired and controlled by Oil", and charging the 1 Secretary with being "the pl potent servant of the Stand

Mr. Hanna issued a series of invectives and making a denial of the statements in the memorandum. It was noticeable, however, that Mr did not deny that the Imp Co., for which he admits he ar, was connected with Stan

On Aug. 30, 1915, the World said: "The Hon. Mr. has long been identified Standard Oil interests in and it is generally believed will be still more identified and still less with politi early date."

NOTES:

Marriage licenses will now instead of \$2 as previously.

Another one million dollars set aside to aid in the improvement of roads.

A Bill will be passed dealing with the improvement in the quality of Ontario's dairy products. It comes into effect until next year.

Wm. McDanald, Liberal member for North Bruce, supported by his colleagues, introduced a bill to have 75 per cent. of the fees paid over to the municipality which the owners of the mills. The Government, however, defeated the Bill.

A clash occurred between Provincial Auditor and Sir Adam Beck, the Public Accounts Committee Auditor claims that there are discrepancies between the total figures shown in the Hydro's books and in the actual vouchers before him. The Auditor said "prepared by the Hydro mission does not reflect in a circular form that I am aware of actual expenditures as appear on the accounts of the Commission from their records."

## NAPANEE TRAIN SERVICE.

TREAT YOUR SEED GRAIN.

Government tests show that 20 per cent. of grain crop is destroyed by smut, but if seed grain is properly treated with formalin grain will show no signs of smut—even very wet years. Formalin, full strength, as recommended by Agricultural Office, for sale at WALLACE'S Drug Store Limited.

P.S.—Ask for instructions and free pamphlets at Wallace's.

## ENEMY'S SUBMARINES

## ACTIVE IN NORTH SEA

PARIS, April 1.—(Delayed.)—Owing to the fact that bad weather has damaged the entente allies' barriers, causing mines to drift and making the entrance to the channel easier, submarine activity in the North Sea has been more active during the last three weeks than for four months, according to a semi-official communication dealing with the marine situation. The communication says:

“During four months there was no torpedoing in the channel, but in the last three weeks enemy submarines have shown activity in this sea. This activity has succeeded owing to the fact that bad weather damaged the allies' barriers, caused mines to drift and made entrance to the channel easier. The enemy doubtless possesses a large number of submarines and can simultaneously attack in the North Sea and in the Mediterranean. Measures have been taken in concert with Great Britain to bar more effectively Pas de Calais and to multiply the trolleys.

“Spring time” means “Kodak time”. Make up your mind this spring to own an autographic Kodak, no holiday is complete without one. Ask for catalogue explaining the new autographic feature. WALLACE'S Drug Store, Limited, sole agents for Kodak.

# Potash, Perlmutter and Others

By MONTAGUE GLASS

## III.—“R. S. V. P.”

[Copyright, The Frank A. Munsey Co.]

**I**T was the 10th of the month, and Abe Potash of Potash & Perlmutter was going through the firm mail with an exploratory thumb and finger, looking for checks.

“Well, Mawruss,” he said to his partner, Morris Perlmutter, “all them high tone customers of yours, they don’t take it so particular that they should pay on the day, Mawruss. If they was only so prompt with checks as they was to claim deductions, Mawruss, you and me would have no worries. I think some of ‘em finds a shortage in the shipment before they open the packing case that the goods come in. Take your friend, Hyman Maimin of Syracuse—nothing suits him. He always kicks that the goods ain’t made up right or we ain’t sent him enough fancies or something like that. Five or six letters he writes us, Mawruss, when he gets the goods, but when he got to pay for ‘em, Mawruss, that’s something else again. You might think postage stamp was solitaire diamonds and that he dasent use ‘em!”

“Quit your kidding,” Perlmutter broke in. “This is only the 10th of the month.”

“I know it,” said Abe. “We should have had a check by the 10th of last month, but”—here Abe’s eye lit upon an envelope directed in the handwriting of Hyman Maimin—“I guess there was some good reason for the delay,” he went on evenly. “Anyhow here’s a letter from him now.”

He tore open the envelope and hurriedly removed the inclosed letter. Then he took the envelope, blew it wide open and shook it up and down, but no check fell out.

“Did y’ever see the like?” he exclaimed. “Sends us a letter and no check!”

“Why, it ain’t a letter,” Morris said. “It’s an advertisement.”

Abe’s face grew white.

“A meeting of creditors,” he gasped.

Morris grabbed the missive from his partner and spread it out on the table.

“Hello!” he exclaimed, a great smile of relief spreading itself about his ears.

“It’s a wedding invitation.” He held it up to the light.

“Mr. and Mrs. Marcus Bramson,” he read, “request the pleasure of Potash & Perlmutter’s company at the marriage of their daughter Tillie to Mr. Hyman Maimin, Sunday, March 10, at 7 o’clock p. m., Wiedermeyer’s hall, 2090 South Oswego street,

R. S. V. P. to residence of bride, care of Advance Credit Clothing company, 2097 South Oswego street.”

“What is that ‘R. S. V. P. to residence of bride?’” Abe Potash asked.

Morris reflected for a moment.

“That means,” he said at length,

“that we should know where to send the present to.”

“How do you make that out?” said Abe.

“R. S. V. P.” Morris replied, em-

buy a fine sterling silver bumbum dish, like what I give you for \$25 I’ll take it off your hands for \$27.50 any day!”

“But, Abe”—

“Another thing, Mawruss,” Abe went on. “If you don’t like that dish, there ain’t no law compelling you to keep it, you understand. Send it back. My Rosie can use it. Maybe we ain’t so stylish like your Minnie, Mawruss, but if we don’t have bumbums every day we could put dill pickles into it.”

“One moment,” Morris protested. “I ain’t saying anything about that bumbum dish, Abe. All I mean that if you give me such a high price present when I get married, that’s all the more reason why we should give a high price present to a customer what we will make money on. I ain’t no customer, Abe.”

“I know you ain’t,” said Abe. “You’re only a partner, and I don’t make no money on you neither.”

Morris shrugged his shoulders.

“What’s the use of wasting more time about it, Abe?” he said. “Go ahead and buy a present.”

“Me buy it!” Abe cried. “You know yourself, Mawruss, I ain’t a success with presents. You draw the check and get your Minnie to buy it. She’s an up to date woman, Mawruss, while my Rosie is a back number. She don’t know nothing but to keep a good house, Mawruss. Sterling silver bumbum dishes she don’t know, Mawruss. If I took her advice you wouldn’t got no bumbum dish. Nut picks, Mawruss, from the five and ten cent store, that’s what you’d got. You might appreciate them, Mawruss, but a sterling sil-

ver”—

At this juncture Morris took refuge in the outer office, where Miss Cohen, the bookkeeper, was taking off her wraps.

“Miss Cohen,” he said, “draw a check for \$25 to bearer and enter it up as a gratification to Hyman Maimin.”

At dinner that evening Morris handed the check over to his wife.

“Here, Minnie,” he said, “Abe wants you should buy a wedding present for a customer.”

“What kind of a wedding present?” Mrs. Perlmutter asked.

“Something in solid sterling silver, like that bumbum dish what Abe gave us.”

“But, Mawruss,” she protested, “you know we got that bonbon dish locked away in the sideboard, and we never take it out. Let’s give ‘em something useful.”

“Suit yourself,” Morris replied, “only don’t bother me about it.”

“All right,” Mrs. Perlmutter said.

“Leave me the name and address and I’ll see that they send it direct from the store. I’ll put one of your cards inside.”

“And another thing,” Morris concluded. “See that you don’t hold nothing out on us by way of commission.”

Mrs. Perlmutter smiled serenely.

“I won’t,” she said in dulcet tones.

### II.

It was the fourth day after Potash & Perlmutter’s receipt of the wedding invitation. When Morris Perlmutter entered the private office he found Abe Potash in the absorbed perusal of the Daily Cloak and Suit Record. Abe looked up and saluted his partner with a malignant grin.

“Well, Mawruss,” he said, “I suppose you sent that present to Hyman Maimin?”

“ent!” Abe said. “That man Marcus Bramson, proprietor, has a big heart, Mawruss. He’s a man with fine feelings and a fine disposition, Mawruss. He’s got a fine rating, too, Mawruss—seventy-five to a hundred thousand, first credit!” He closed the book almost lovingly. “D’ye think they would give the money back for that present, Mawruss?”

“I don’t know,” said Morris. “Minnie bought it, and she told me it was a big bargain. It was a sale, she said, but I guess they’ll take it back.”

“What did it look like?” Abe said.

“I didn’t see it,” Morris replied. “They sent it direct from the store, but I took Minnie’s word for it. She said it was fine value.”

“And Minnie,” Abe concluded, “is a fine, up to date woman!”

### III.

Two days later Abe Potash spotted the name of Marcus Bramson in the “Arrival of Buyers” column of a morning newspaper.

“Mawruss,” he cried, “he’s come!”

“Who’s come?” Morris asked.

“Marcus Bramson,” Abe replied, reaching for his hat. “I’m going over to the Bingley House now to meet him. You wait here till I come back. I bet you we sell him a big bill of goods.”

As Abe went out of the store by the front door an expressman, bearing a square wooden box, entered the rear alley. He brought the package straight to Miss Cohen, who signed a receipt and summoned Mr. Perlmutter. Morris proceeded to pry off the cover.

“This is something what Mrs. Perlmutter bought for Hyman Maimin’s wedding present,” he explained. “I ain’t never seen it yet.”

“Oh, Mr. Perlmutter,” Miss Cohen exclaimed, clasping her hands, “what a beautiful bonbon dish! What a lovely wedding present!”

Morris looked at the bonbon dish, and beads of perspiration started on his forehead.

“Ain’t Mrs. Perlmutter got good taste!” Miss Cohen went on enthusiastically.

Morris said nothing, but picked up the silver dish. Examining the polished center carefully, he discerned the indistinct initials “M. P.” almost but not quite effaced by buffing. Undoubtedly it was the same bonbon dish.

He gathered up the tissue paper and carefully arranged it in the box as a bed for the silver dish. Then he put the cover on and nailed it down.

“Ain’t you going to let Mr. Potash see it?” Miss Cohen asked. “He ain’t never seen it before neither, has he?”

Morris frowned.

“I think he has,” he replied. “Anyhow, I’m going to send it right up town by messenger boy.”

“Do you think they’ll exchange it?” Miss Cohen inquired.

“Oh, I guess it will be put back in stock all right!” said Morris, turning away.

### IV.

The next morning when Morris entered the store Abe was busy figuring on the back of a torn envelope.

“Hello, Mawruss!” he cried, looking up. “Ain’t it a beautiful weather?”

Morris agreed that it was.

“That Mr. Bramson,” Abe went on. “That’s one fine gentleman, Mawruss. He ain’t what you’d call a close buyer neither, Mawruss.”

“No?” Morris commented.

# ESPECIALLY WOMEN

## “Fruit-a-tives” Now Known as Woman’s Best Medicine

“FRUIT-A-TIVES,” the fruit medicine is particularly well suited for the use of women, because of its gentle action and its pleasure.

In severe cases of Constipation, Bloating, Sick Headache, In The Back, Neuralgia, or a Run-Down Constitution, “Fruit is the only medicine needed to such troubles and restore the to complete health.

As a tonic, “Fruit-a-tives” is suitable to purify and enrich the body and build up strength and vigor.

50c. a box, 6 for \$2.50, trial. At dealers or sent postpaid to F. A. T. a-tives Limited, Ottawa.

## NO DRY BATTERIES

They All Contain Moisture Would Be Useless.

So called dry batteries are in use for small electric call bell and private telephone lines and used extensively for ignition of makes of automobiles. Applying “dry” to the battery is misleading, for there is no such thing as a “dry” battery. There never will there ever be.

If it were dry no current could generate, as it requires moisture to produce chemico-electric activity; the circuit is completed from the minus elements.

The so called dry battery is an “inclosed wet battery,” which its moisture to its limit of life in service or not. The limit depends on the stored capacity; frequently the circuit is applied by evaporation due to age and damage of the conducting elements.

The battery consists of a zinc case containing a carbon center, the intervening space with a paste compound of zinc oxide, one part sal ammoniac and three parts plaster of paris and parts water. The quantities are as the capacity of the battery increased.

As soon as a circuit is completed, a chemical combination is started the current flows from the part of the zinc to the carbon out from the carbon to the anode and returns to the zinc. The terminals of the battery are reverse of the internal.

When the battery is exhausted it is recharged by sending current from a close circuit battery, a nitric or sulphuric acid cell, using water through a small hole top of the battery is an aid to turn of its life, but neither the former will restore the battery to its original efficiency.

that we should know where to send the present to."

"How do you make that out?" said Abe.

"R.S.V.P.," Morris replied, emphasizing each letter with a motion of his hand, "means, 'Remember to send wedding present'."

"But," Abe rejoined, "when I went to night school, we spelt 'wedding' with a 'W'."

"A greenhorn like Maimin," said Morris, "don't know no better."

"He knows enough to ask for a wedding present, Mawruss," Abe commented.

"What is that 'R.S.V.P. to residence of bride'?" Abe Potash asked.

ed. "even if he don't know how to spell it. We'll send him a wedding present, Mawruss. We'll send him a summons from the court, that's what we'll send him."

Morris shook his head.

"That ain't no way to talk, Abe," he said. "If a customer gets married we got to send him a wedding present. It don't cost much, and if Hyman Maimin gets a couple of thousand dollars with this Miss-Miss"—

"Advance Credit Clothing company," Abe helped out.

Morris nodded.

"Then he buys more goods, ain't it?" he concluded.

"Let him pay for what he's got," Abe rejoined.

"It just slipped his mind. He'll pay up fast enough after he gets married."

"All right! Wait till he pays up, and then we'll give him a present."

"Now looky here, Abe," Morris protested. "you can't be small in a matter of this kind. I'll draw a check for \$25 and—"

"Twenty-five dollars!" Abe screamed. "You're crazy! When you was married last year I'd like to know who gives you a present for \$25."

"Why, you did, Abe," Morris replied.

"Me?" Abe cried. "Say, Mawruss, I want to tell you something. If you can

malignant grin.

"Well, Mawruss," he said, "I suppose you sent that present to Hyman Maimin?"

"I sent it off long since already," Morris replied.

"I hope it was a nice one, Mawruss," Abe went on. "I hope it was a real nice one. I'm sorry now, Mawruss, we didn't spend \$50. That would have made it an even seven hundred, instead of only six hundred and seventy-five, that Hyman Maimin owes us."

"What d'ye mean?" cried Morris.

"I don't mean nothing, Mawruss—nothing at all," Abe said, with ironical emphasis. He handed the paper to Morris. "Here, look for yourself."

A petition in bankruptcy was filed late yesterday afternoon against Hyman Maimin, 83 West Tonawanda street, Syracuse. It is claimed that he transferred assets to the amount of \$8,000 last week. Mr. Maimin says that he has been doing business at a heavy loss of late, but that he hopes to be able to resume. A settlement of 30 cents is proposed.

Morris sat down in a revolving chair, too crushed for comment, and drummed with a lead pencil on the desk.

"I wonder if he done up his intended father-in-law, too?" he said at length.

"No fear of that, Mawruss," Abe replied. "He ain't no sucker like us, Mawruss. I bet you his father-in-law—what's his name?"

"The Advance Credit Clothing company," Morris suggested.

"Sure," Abe went on. "I bet you this clothing concern says to him: 'If you want to marry my daughter you gotter go into bankruptcy first. Then, when you're all cleaned up, I'll give you a couple of thousand dollars to start as a new beginner in another line.' Ain't it?"

Morris nodded gloomily.

"No, Mawruss," Abe continued. "I bet you his father-in-law is a big crook like himself."

He rose to his feet and opened the large green and red covered book furnished by the commercial agency to which they subscribed.

"I'm going to do now, Mawruss, what you should have done before you sent that present," he said. "I'm going to look up this here Advance Credit Clothing company. I bet you he ain't even in the book—what?"

Before Morris could reply the letter carrier entered with the morning mail. While Abe continued to run his thumb down the columns of the commercial agency book, Morris began to open the envelopes. Both their heads were bent over their tasks, when an exclamation arose simultaneously from each.

"Now, what d'ye think of that?" said Abe.

"Did y' ever see anything like it?" Morris cried.

"What is it?" Abe asked.

For answer, Morris thrust a letter into his partner's hand. It was headed "The Advance Credit Clothing Company—Marcus Bramson, Proprietor" and read as follows:

Messrs. Potash & Perlmutter:

Gents—Your shipment of the 5th is to hand, and in reply would say that we are returning it via Blue line on account Miss Tillie Bramson's engagement is broken. We understand that low life H. Maimin got into you for \$60. Believe me, he done us for more than that. Our Mr. Bramson will be in New York shortly and will call to look at your line. Hoping we will be able to do business with you, Yours truly, THE ADVANCE CREDIT CLOTHING COMPANY. Per T. B.

"So he's going to send back the pres-

"That's one fine gentleman, Mawruss. He ain't what you'd call a close buyer neither, Mawruss."

"No?" Morris commented.

"The way I figure it," Abe continued, "reckoning on what we lost by Hyman Maimin, if he settles for 30 cents, and what we make out of Mr. Bramson's first order, we come out even to the dollar."

"So?" Morris murmured.

"All excepting that wedding present, Mawruss," said Abe. "By the way, Mawruss, ain't that wedding present come back yet?"

"Why, sure," said Morris. "It come back yesterday when you were out."

"Why ain't you showed it to me? Ain't I got no right to see it, Mawruss?"

"Of course you got a right to see it," Morris assented, "but I thought I'd get it right uptown to Minnie and have it exchanged."

"And did she exchange it?" Abe asked.

"Well, it's like this," Morris explained: "Minnie liked it so well that she decided on keeping it. So I'll give the firm my personal check for \$25."

Abe puffed hard on his cigar.

"You're a purty generous feller, Mawruss," he commented, "to give Minnie a present like that for nothing at all, ain't it?"

"Oh, no, I ain't. Abe!" Morris replied. "I ain't giving it to her for nothing at all. I'm taking it out of her housekeeping money, Abe, \$5 a month."

#### Both Ways.

"What on earth are you doing sneaking around in the room that way, Maria, when you know I can't bear to be disturbed?"

"I was looking for an egg to make the cake icing with."

"Well, beat it!"

#### His Plan.

"He's one of our most successful business men."

"That so? What's his secret?"

"Well, in the first place he insists upon his clerks selling his customers what they want, not what the clerks themselves wear."

What men want is not talent, it is purpose; not the powers to achieve, but the will to labor.

#### An Ancient House.

"The ancient Romans had a catapult that could hurl rocks more than a mile."

"Now I understand it."

"What?"

"My landlord told me the house was a stone's throw from the depot. He must have had it on his hands since the time of the Caesars."

#### Ballot and Suffrage.

"Ballot" and "suffrage" show the language perpetuates the memory of primitive methods. A "ballot" should be a vote taken with balls—one of the various ancient Greek instruments of secret voting. And the word "suffrage," which by some is derived from "suffrago," a knucklebone or anklebone, in that case recalls an early method of recording the vote.

the former will restore the its original efficiency.

#### Matrimonial Dyspepsia

"Well, how do you like man: inquired the friend.

"Not at all," replied the had married money and was for it. "I'm a case of matrimonial dyspepsia."

"Matrimonial dyspepsia?" "Yes. She never agrees She's too rich."

#### Siam's Royal Palace

One of the most remarkable in the world is the palace of Siam. It is inclosed in white walls over a mile in circumference. Within these walls are public offices, seraglios, stable, sacred elephant, accommodates thousand troops, cavalry, war and an arsenal. There is a fine theater.

#### Tar Water.

Tar water was a cure-a-eighteenth century. It was by pouring a gallon of white quart of tar, and the dose was a pint in the morning and a second in the afternoon. Its use is fashionable that a contended, "It's as common to call of tar water in a coffee house of tea or coffee."

#### Where Does Lightning

Lightning is the light caused by the passage of an electric current through the air. An electric discharge, so we say, where does the lightning go? It reaches the ground? With the of the electricity the lightning goes. But it is not the lightning that reaches the ground; it is the That passes into the ground changes that man is just be understand. It has a definite effect on the soil and upon the life of the soil.

#### The Head of the Firm

As he appears to— The office boy: A large, whose grumble is worse than thunder and whose comment is worth almost any amount of inconvenience.

Head bookkeeper: A good no head for figures, who at his present exalted position combination of luck and pull.

The stenographer: A pale party with singular weakness a strange capacity—rarely however—to make one cry.

His wife: A baby.

#### Repartee.

On the train going out into conversation with a stranger remarked:

"I see you are putting many new buildings."

"Yes," answered Subbu buildings are the only kind

**SHILC**

quickly stops coughs, cures colds the throat and lungs.

Pouring through a small hole at the battery is an aid to the re-life, but neither this nor will restore the battery to efficiency.

## THE GOOD WIFE.

### A Treasure, Holding In Her Hands the Destiny of posterity.

When a woman enters the marriage relation her sphere of influence is at once extended, and her horizon is no longer bounded by the people and circumstances of the moment.

She is building for posterity. In the joy and thoughtfulness which characterize her mind in the new relation there is a prophecy of unborn generations. Her life is to color other lives; her aspirations are to fix to a great extent the position and future of husband and family.

If she is cultured, pure and refined these qualities will characterize the home which she creates. The higher the degree of her culture, her purity, her refinement, the more will these qualities characterize the home of which she is the center.

The personality that a woman takes with her in her marriage is her real dower. If her dower can be reckoned in numerals only, no matter how many they be, wrecked indeed will be her husband, impoverished her children.

But if she possesses industry, gentleness, self abnegation, purity and intelligence, combined with capability, she is in herself a treasure of treasures.

## FAMOUS PLACE NAMES.

### Why Should They Not Be Called Alike All Over the World?

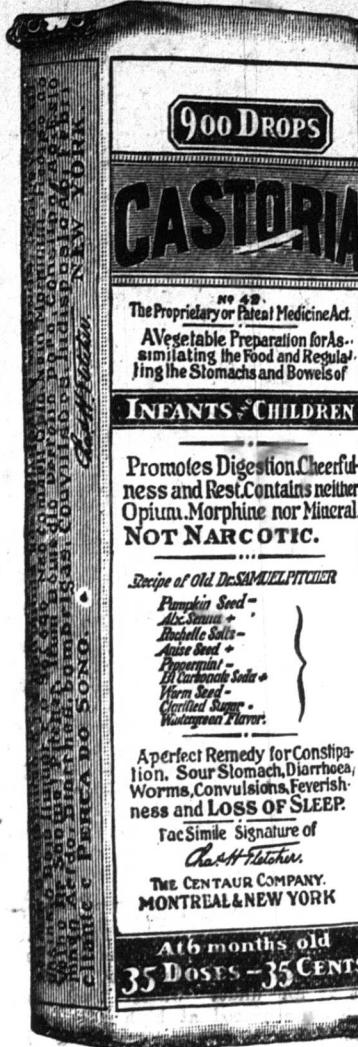

It is perhaps too much to expect that a universal meridian or universal time will ever be established, still less that we shall have universal money or a universal secondary language. All these things might be brought about if we could only get rid of our prejudices.

It is not, however, too much to hope that the present confusion of place names should be got rid of. Why the English and the French should persistently describe as Cologne and Mayence, cities which their own inhabitants never call anything but Köln and Mainz, it is difficult to understand, and there is certainly no excuse for our pronouncing the name of the Bavarian capital as "Munick," as if in scorn of the dwellers therein, who call it, as nearly as English letters will reproduce the sound, "Minchen." Why should an Italian gratuitously misname London "Londra?" We really ought to know how our own capital should be called.

As to Polish place names, also Przemysl and the like, only an international commission could decide. — London Globe.

### A Strict Dramatic Censor.

Vienna once possessed the strictest dramatic censor ever known in the person of Franz Hoegelin, who held that post in the Austrian capital at the beginning of the last century. Hoegelin published a manual for the guidance of censors. "A pair of lovers should never be allowed to appear on the stage alone. They must always be accompanied by a third person of mature years." Marriages out of one's class were also strictly forbidden by Hoegelin on the stage, and he quotes an instance of a play which he refused to pass because the author made

## VIRTUE OF A GOOD LAUGH.

### A Tonic That Stimulates the Body and All Its Organs.

There is not the remotest corner or little inlet of the minute blood vessels of the human body that does not feel some wavelet from the convulsion occasioned by good hearty laughter.

The life principle, or the central man, is shaken to the innermost depths, sending new tides of life and strength to the surface, thus materially tending to insure good health to the persons who indulge therein.

The blood moves more rapidly and conveys a different impression to all the organs of the body as it visits them on that particular mystic journey when the man is laughing from what it does at other times.

For this reason every good, hearty laugh in which a person indulges lengthens his life, conveying, as it does, new and distinct stimulus to the vital forces.

Doubtless the time will come when physicians, conceding more importance than they now do to the influence of the mind upon the vital forces of the body, will make up their prescriptions

## LUNGS OF A BATTLESHIP.

### Ventilation Is a Serious Problem In Building War Vessels.

One of the most difficult problems in building a battleship is to secure satisfactory ventilation. She is a very complicated creature, made up of so many steel boxes, large and small, for the accommodation of officers, men, coal, ammunition and stores, dotted here and there with so many steel ladders, automatic lifts, steel bulkheads and water tight doors, varied here and there by miles of electric wires belonging to lights, telephones, bells and motors, to say nothing of the endless mileage of pipes for flooding, draining, pumping, fresh water, fresh air or compressed air and speaking tubes.

First in importance comes the ventilating of the boiler and engine rooms. When you begin to think of gangs of coal black demons working away in the bowels of the ship at a temperature of 120 degrees; when, too, you commence to realize that unless the furnaces receive their required draft the speed of the battleship drops to below that of her sisters in the squadron, you appreciate the importance of the steam driven fans to the furnaces

mature years." Marriages out of one's class were also strictly forbidden by Hoegelin on the stage, and he quotes an instance of a play which he refused to pass because the author made the hero, Count Valdemar, marry a gardener's daughter. "Such misalliances have unfortunately been known to occur in real life, but that is no reason why they should be allowed on the stage," he said.

#### The Hippopotamus.

In spite of its clumsy build the hippopotamus can trot fast. That is why he is called "river horse." The hippo's feet are kept far apart by the wide body and make paths with a ridge down the middle, recognizable at once. Hippos swim very well, but go at their greatest speed when they can gallop along the bottom in shallow water. They can stay under water a long time, and when they come to the surface they send little jets of spray from their nostrils. The cow is devoted to the calf. The young one stands on her back as the mother swims.

#### Cyrus and the Persians.

The Persians of the time of Cyrus were Zoroastrians. The Persian religion was primitive monotheistic, and they allowed no idols or other material symbols of deity in their temples. There was less enmity on the part of the Jews against the Persians than against the other great nations with whom they came in contact, due probably to the monotheism which characterized the Persian religion. So Cyrus, whatever else may be said of him, was certainly not an idolator.—Christian Herald.

#### Napkins.

Napkins became popular in France sooner than in England. At one time it was customary at great French dinners to change the napkins at every course, to perfume them with rosewater and to have them folded a different way for each guest.

#### Halcyon Days.

A halcyon is a kingfisher, and "halcyon days" are so called because it was supposed that the weather was always peaceful when the kingfisher was breeding.

#### Hardly.

Mrs. Kawler: Do you consider Alice very good looking? Mrs. Blunderby: Oh, Alice is pretty enough, but I would not call her an Adonis.

He who has conquered doubt and  
fear has conquered failure.—James Allen.

#### Greatness and Efficiency.

"A great man's mind is superior to envy," remarked the philosopher.

"Yes," replied the ordinary person.  
"It is if he's great enough to get  
what he goes after instead of having  
to see some one else walk off with it!"

#### Apparent Contradiction.

"She twists her husband around her  
little finger."

"Why, I thought you said she had  
him under her thumb."

Doubtless the time will come when physicians, conceding more importance than they now do to the influence of the mind upon the vital forces of the body, will make up their prescriptions more with reference to the mind and less to drugs for them and will, in so doing, find the best and most effective method of producing the required effect upon the patient.

#### And All This Was Polite.

Royal banquets in France at any era between the reign of Francis I. and Louis XIV. would show the duchess, her napkin tied securely around her neck, nibbling a bone, the noble marquis surreptitiously scratching himself, the belle marquise withdrawing her spoon from her lips to help a neighbor to sauce with it, another fair creature scouring her plate with her bread, a gallant courtier using his doublet or the tablecloth as a towel for his fingers and two footmen holding a yard of damask under a lady's chin while she emptied her goblet at a draft. All of these at one era or another were the usages of polite society. During a feast of inordinate length it was sometimes necessary to substitute a clean cloth for the one which the carelessness or bad manners of the guests reduced to a deplorable condition.

#### Overpledged.

"Lend me \$10, old man. I pledge you my word of honor I'll pay it back next Saturday."

"Sorry, but I loaned you fifteen on that security a month ago. I'll have to ask you to put up something more tangible this time."

#### In Motor Circles.

"Now, ma," cautioned pa, "don't force too much on your guests at dinner."

"What then?" sniffed ma.

"Make it a sociability run and not an endurance contest."

#### For Rough Weather.

"I think I've got a winner in ladies' footgear."

"What is it?"

"I'm working on a scheme to put shillies around the tops of overshoes."

## The Reliable Match...

furnaces receive their required draft the speed of the battleship drops to below that of her sisters in the squadron, you appreciate the importance of the steam driven fans to the furnaces and boiler rooms. The supply of air comes down through large water tight trunks, which are continued right up to the weather deck, armored gratings being provided at the protective deck.

For ventilating engine rooms large electric fans are employed. So, too, the coal bunkers have to be ventilated, owing to the gas which the coal gives off. This gas when mixed with air forms an explosive, so in order to prevent the possibility of injury to men or ship supply and exhaust pipes are fitted in such a manner as to cause a current of air.

#### Saving a Black Fox Skin.

Presence of mind is the soul of manly exercises. If soldiers and sailors owe it to many of their lucky escapes, hunters and sportsmen are not less beholden to it for many of their successes. In a noble forest in Russia I met a black fox whose valuable skin it would have been a pity to tear by ball or shot. Reynard stood close to a tree. In a twinkling I took out my ball and placed a good spikenail in its room, fired and hit him so cleverly that I nailed his brush fast to the tree. I now went up to him, took out my hanger, gave him a cross cut over the face, laid hold of my whip and fairly flogged him out of his fine skin.—Munchausen.

#### Monarch.

I am the real ruler of the universe. I cover with dust the masterpieces of the earth. Ancient forms shrink before my ever awakening presence.

And memory cowers.

Men bow before my scepter like slaves of the light. And women, their eyes fixed by my spell, follow where I lead.

The puny baby in the nursery and the gray bearded patriarch alike hearken to my magic voice. I paint the earth with divers colors, and the scientist, the doctor, all the rulers of man, awake to do my bidding.

I am monarch of all I survey. None disputes my eternal majesty.

My name is novelty.

The Dominion Match Co., Limited, Deseronto, Ont.

W. S. MORDEN, President.

C. J. ANDERSON, Manager.

## SHIPPING BY PARCEL POST.

### Careful Packing and High Quality Necessary for Good Returns.

Proper packing for parcel post marketing is of primary importance and needs to be emphasized so that both the contents and the container may carry properly, arrive in good condition and present a satisfactory appearance. The pack should be regular, of as nearly uniform produce as possible and of full measure according to the quantity ordered. A little practice will enable almost anyone to pack a basket or container of any kind in a satisfactory manner.

One important requirement for parcel post shipping and marketing is a proper and satisfactory container. Sometimes the consumer can secure containers more readily and economically than the producer. Those with handles are much less likely to be damaged in transit in the mails than those which are not thus supplied and which are likely to be tossed or thrown or handled by the string or twine used in tying them. A bamboo basket serves the purpose very well, and may be used a long time.

Ordinary splint baskets made of strips of veneer may also be used, and if they can be secured at a price

PARCEL POST MARKET BASKET OF ASSORTED VEGETABLES, UNCOVERED AND COVERED.

sufficiently cheap a new one for each shipment is more economical than having them returned, unless they are sent back in lots of ten or more under one cover. This of course necessitates using them without a wooden handle, in which case a heavy twine should be used for a handle. This twine can be untied and the baskets nested or placed in one another for return shipment. If a basket with a wooden handle is used care should be taken to see that

and unattractive articles are passed by promptly. Produce should be of high quality, clean and attractive, carefully and neatly prepared and packed, of one variety, and, as far as practicable, uniform in size, shape, color, and quality, and last, but not least, carefully packed to insure its arrival in a satisfactory condition.

### BUILDING WIRE FENCES.

#### Fifty Per Cent. of Those in This Country Improperly Constructed

The cost o' fencing is a considerable item on every farm. In constructing his fences therefore it will pay the farmer to see that the work is well done and that the full benefit is obtained from the labor and material employed. It is no exaggeration to say that 50 per cent. of the wire fences in use to-day are not properly constructed.

The ends and corners are by far the most important elements of a fence. It is absolutely essential that they remain firm and solid if the fence is to be rigid. Points to be borne in mind when setting wooden end or corner posts are: First, the posts used should be large enough to give sufficient strength; second, they should be set deep enough not to heave through the action of frost, the end or corner post being put into the ground to a depth of four and a half feet and the brace post four feet deep, and third, the brace post should not be set so close to the end post and at such an abrupt incline that there is a tendency for it to force the end post out of the ground. It is generally considered that the two posts should be set about ten feet apart, which would require a brace twelve feet long. The brace is usually inserted in a mortise on the end post, twelve inches from the ground line.

Where steel posts are used the instructions furnished by the manufacturers should be carefully followed. Concrete end and corner posts should be made of a good grade of concrete and thoroughly re-enforced. The reinforcement, which may be done with scrap iron such as wagon tires, axles, etc., should be placed so that the strain caused by the pull of the fence will bear against it.

The distance that line posts should be set apart depends on the location of the fence and the number and kinds of stock to be turned. In the field fence the common practice is to set them approximately every twenty feet; around barn lots and pens, posts are set more closely together. Many farmers set posts one rod apart, which is a convenient arrangement because it supplies a quick method for measuring portions of the field, checking up the amount of work accomplished each day, etc.

In woven wire fencing the necessary tools are a woven wire stretcher, a single wire stretcher, for use in attaching the fence to the end posts, a pair of wire cutters, a barbed wire stretcher, a splicing tool, and hammers for stapling and fastening the fence. Before the wire is stretched the fence row should be freed from obstructions and ridges and uneven surfaces should be smoothed off so that the fence will be straight on the ground. The wire should be securely fastened to one of the end posts and ten unreeled.

After the wire is unrolled the stretchers are attached, leaving plenty of chain to draw up the slack in the wire. The stretching should be continued until the line wires are

### POULTRY NOTES.

Don't keep two or three different kinds of ducks. Choose one variety and breed for quality.

Musty or low grades of corn should never be used in a well conducted poultry plant, and their cheapness should be no inducement for their use.

The duck that lays ten dozen eggs in a year is a good one for laying. Indian Runners are claimed to lay 200 eggs in that time.

Close confinement is the first thing to be done in the fowl fattening process. The nutrition got out on the range is turned into bone, sinew and muscle. Fat cannot accumulate when birds are getting much exercise.

When a whole flock is unthrifty and run down in constitution it is a good idea to sell all the birds and begin with a few healthy ones.

## TO GROW ALFALFA

### Some First Principles

Mr. Math Miche

They are calling alfalfa of all the clovers in many of the west. It yields man under favorable condition hay is most nutritious. If it is a soil enricher, so that succeed alfalfa abundantly. Those who are well as those who are wit

CUTTING ALFALFA

ience will be interested in the following hints:

Use home or western with a germination test, or better.

Select any soil that will. Fall plowing is preferable. Thorough but shallow in the spring.

Sow fifteen pounds of and one bushel of barley.

If a drill with seeding is used drop seed ahead of the seed. No harrowing needed. If the barley is hand seeder follow with rowing.

If the barley should lodge cut for hay; if it is low it to ripen. In it off the field as soon after cutting.

Do not cut again nor first year. The heavier the fall the better. Old as well as new fields of smothering itself, high.

Cut as soon as new s out from the crown. Th at the time the first b

### Latch For Farm Gate.

handle. This twine can be untied and the baskets nested or placed in one another for return shipment. If a basket with a wooden handle is used care should be taken to see that it is securely nailed, not only at the rim of the basket, but farther down toward the bottom, so as to prevent undue leverage which may break loose the nailing.

Corrugated pasteboard cartons frequently may be found useful and desirable for this service. They are made in a great variety of sizes, dimensions, and patterns, and when empty are shipped "knocked down" flat.

It is probable that the point which will make the strongest appeal to the average consumer is that he can secure by parcel post a fresher, brighter, more attractive, and thus possibly a better product than he can obtain otherwise. Producers should remember always that the appearance of fruit and produce is one of the strongest factors in making a sale.

It will not pay to market anything but standard and fancy produce by parcel post, and the surest way to establish a dependable, continuing and increasing business is to forward nothing but strictly reliable and satisfactory produce.

The average producer, as a rule, does not realize the importance of appearance as a factor in selling goods, and frequently is careless and indifferent in preparing produce for market. The consumer, on the other hand, relies very largely upon appearance in selecting food supplies

After the wire is unrolled the stretchers are attached, leaving plenty of chain to draw up the slack in the wire. The stretching should be continued until the line wires are so taut that they cannot be pressed together by hand. The fence should then be securely fastened to the corner toward which it is being stretched. The next step is to fasten the wire on the line posts. In doing this the line wires should be kept as nearly horizontal as possible and should not zigzag up and down from post to post, following small irregularities in the ground line. The fabric should not be fastened tightly to each post, but the staples should permit horizontal movement of the wire. This will provide for the contraction and expansion of the wire under varying weather conditions and will also enable the entire fence line to bear a part of the force of any blow that is delivered against the fence.

The final step is to place a strand of barbed wire about four inches above the top of the woven wire, so that the stock will not be able to get their heads between the two. A woven wire fence should not be considered complete without this strand of barbed wire. It protects the woven wire by preventing stock from reaching over and crowding it down.

#### Solid Hog Comfort.

This hoghouse may be made of any convenient size. But here is the bill of material needed for one 6 by 6 feet on the ground plan.

Eight 2 by 4 inch by 6 foot plates, ridge and floor joists; two 2 by 4 inch by 8 foot end plates; four 1 by 12

inch by 12 foot floor and side; two 1 by 12 inch by 18 foot ends; six 1 by 12 inch by 8 foot roof; nails and two pair six inch strap hinges.

You will notice that a floor is provided for. This makes the hoghouse dry and warm for winter use. On bright days open the roof door to let in the sunshine.

The roof door is also convenient for the purpose of watching the sow during farrowing time.—Farm and Fireside.

#### The Ounce of Prevention.

Supply the poultry with a hopper of bran where they can help themselves at will; also supply them with charcoal and grit. In short, do your best to keep them in good health. There is a good deal more sense in preventing a chicken from getting sick than in curing it after it gets ill.

#### France Losing Ground.

In the first six months of last year the number of cattle in France decreased by 381,394, sheep by 558,172, and hogs by 435,495.

#### A Challenge.

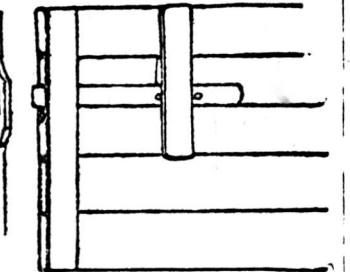

Name a case where it paid to raise the daughter of a scrub bull.

Children Cry  
FOR FLETCHER'S  
CASTORIA

the self branching sorts, is excellent for that purpose.

#### Latch For Farm Gate.

A good latch for a gate may be made as shown in diagram—a sliding board placed above the middle board and an opening left in the end for it

to slide through. Bore holes in this latch, one for peg to keep it from sliding out and one for peg to lock when closed. This peg should be attached with a string. For a nosing make as shown on post.

#### An Easy Celery Crop.

There are many ways of growing celery in the home garden, says the Country Gentleman, but one of the easiest and best ways is to sow the seed in May in a rich, damp place and then to cover it with a wet sack or a piece of burlap until it sprouts. The plants should be set out between the middle of July and the middle of August. They do not begin to grow well until the cool, rainy weather of late summer. They are set in trenches a foot wide, about nine inches deep and two feet apart. The plants are placed four inches apart in the row. As they grow the earth is filled in about them.

#### MATING PENS.

Have you considered any addition to your poultry yard? A small trial with ducks, geese, turkeys, capons or pigeons may prove profitable.

See that these layers are receiving a good laying ration, supplying plenty of protein, green feed, and oyster shell. This is the time to feed the surplus vegetables that are stored away in the cellar. A cabbage head suspended by strings a couple of feet from the floor will be relished by the hens. Be sure you are giving them plenty of exercise. Whole grain should be fed in a ten inch litter.

Clear up the incubator and get it in running order. It might be advisable to run a trial hatch before the season opens.

There is always some new equipment such as brooders and feed hoppers, and this is the time to order all such supplies.

#### Making Tommy Attractive.

Ethel, the twelve-year-old daughter of a family that resides in an uptown apartment house, recently said to her mother:

"Mother, I wish you'd wash Tommy's face."

Now, Tommy was the son of the man whose apartment adjoined theirs, so mother was both alarmed and astonished.

"The idea!" she exclaimed. "Why, he's a neighbor's child! I have nothing to do with him."

"But I have," explained Ethel. "We've become engaged, and I want to kiss him."

high.

Cut as soon as new spro out from the crown. This is at the time the first blosspear.

Alfalfa should be cut big cutting bar a notch or two than you would for other grass as not to injure the new thereby getting a quicker more hay at the next cutting.

Alfalfa must be cut three and only three times to keep best of health.

## A Spring Tonic

Substantial Proof by a Canadian Witness.

Beechmont, Ont.—"I feel it my duty to tell what Dr. Pierce's remedies have done for me. When I commenced taking them I was completely run down. I have taken altogether nine bottles of the 'Golden Medical Discovery' and 'Favorite Prescription,' together with the 'Pleasant Pellets' and can truthfully say that

I feel like a new woman. I would certainly recommend these medicines to any one suffering as I did."—MRS. WM. PLUMLEY, Beechmont, Ont.

An imitation of nature's method of replacing waste of tissue, enriching impoverished blood and increasing nerve force is when you take an alterative extract of herbs and roots made with pure glycerine, without the use of alcohol, like Dr. Pierce's Golden Medical Discovery. This vegetable medicine coaxes the digestive functions and helps in the assimilation of food, or rather takes from the food just the nutriment the blood requires.

Pure blood is essential to good health. Dr. Pierce's Golden Medical Discovery not only cleanses the blood of impurities, but it increases the activity of the blood-making glands, and enriches the body with an abundant supply of pure, rich blood. It thus cures scrofula, eczema, erysipelas, boils, pimples and other eruptions that mar and scar the skin.

Write Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., for free medical advice or for free booklet on blood.

## Made Over frocks

It is not the fashion to make over our frocks nowadays.

We used to buy expensive materials and then have the frocks into which they were made remodeled and sometimes made over a second time. We don't do that nowadays usually. We buy poorer materials than we used to buy, and styles change more quickly than they used to change. Moreover, most people have fewer frocks than they used to have. They wear each frock continuously until it is worn out.

However, making over frocks often pays, and some dressmakers have lately been advertising their desire to make over frocks. These are expensive dressmakers, with high priced trades, and the frocks they make over are often imported models. They are real artists in the fashioning of fabrics into charming frocks, and they have the faculty of visualizing a remodeled frock after they have looked at and thought about the old frock for a little while.

This kind of remodeling surely pays. A practically new frock results, up to the last minute in its details. Nowadays a woman of fashion wears her frocks for such a short time that nobody remembers their colors and fabrics, and anyway, in remodeling, fabrics and colors are fashioned in different combinations from their original ones.

There are, for instance, the various jumper styles. The old material can be fashioned either into the jumper or into the blouse under it. Suppose there is an old black net frock. After it has been ripped and pressed and, if necessary, cleaned, the good separated from that which is torn, the net can be made into a blouse, with the best part in the sleeves and front. Then you can buy enough silk to make the jumper and the foundation of the skirt. There can be no flaring overskirt of the net, long or short, pointed or straight at the bottom, according to the amount of material.

There is also possibility for making over in the skirt with a very wide hem of contrasting material. Sleeves, or at least cuffs and collars, can be made of the same material as the hem, and new material may be bought either for this combination or for the rest of the frock.

## FOR HOUSEWEAR.

## FETCHING SIMPLICITY.

One of the Spring Models That Promises to Be Very Popular.

SO CHIC.

This elongated peach basket comes in all the favorite spring straws and novelty weaves. This one is deep tan, with a satin rose set slightly one side of the center front. What gives style to this hat is the enveloping veil of coarse mesh bound with brown ribbon and "belted" at the neck with a slightly wider ribbon held by a rose matching the one on the hat.

## CASSEROLE COOKING.

### Appetizing Viands Depend Upon Daintily Serving of Them.

The cooking done in casseroles has several important advantages over that of the ordinary kitchen vessel. The dishes are without the metal taste which so often contaminates common pots and pans. As the cooking is slow and thorough the nutritive values of food are preserved, and the perfection of the flavor is therefore concentrated.

The ornamental appearance of the various dishes used permits serving the viands in the very utensils in which they were cooked, which is a tremendous point when the dish needs to be eaten very hot. Food can be put away in the casserole without danger of changing color or taste, as would happen if it were left to chill in a metal vessel. The earthenware of which the dishes are made is not open to the acid influences of fruit and therefore is without the possibility of any noxious change. The enamel of the inside does not scale off, it is easily kept clean, and so food prepared in the casserole is clean and sweet.

The pretty marmite for soupmaking, the larger and smaller pots and shallow pans and plates in every size can be bought. Among the many shades of brown there are some green tones (these vessels of French make), which are very effective on the table. Some don'ts are involved in the proper care of the charming utensils.

Rest and freedom tonight from RHEUMATISM

Make good use today of the splendid healing and penetrating oils found only in Chamberlain's Antiseptic Liniment. It takes the weary ache and pain from the muscles and supplies the joints, so you will get your full rest and sleep tonight.

## Chamberlain's Liniment

gives prompt relief in all muscular or deep seated pain—rheumatism, neuralgia, lame back, lumbago, etc. Splendid to rub on the chest for colds and coughs. Low price, yet very efficient.

ly withers at another's joy the excellence it cannot onson.

SIMPLE BEAUTY.

vest, a pointed tunic, snug cuffs and a banded skirt are all good points. This model will be beautiful in any of the novelty taffetas.

#### Flemish Sausages.

These sausages are different from other kinds, and they are made in the following way: Take a pound of beef, a pound of pork, a pound of back fat (pork), half an ounce of brown sugar, a pinch of saltpeter, an ounce of salt, an eighth of an ounce of ground pimento and a quarter of an ounce of pepper. Mince the meat up finely, also the fat, add the seasoning, let it stand for a few hours, then add a pint of water in which a quarter of an ounce of strong tea has been infused, mix up well and fill into skins, or it can be made into little balls as large as walnuts. They are cooked on the stove and served for tea.

#### Asparagus Salad.

Roquefort dressing. Drain the liquid from a can of asparagus tips and put them on ice for half an hour. Then arrange on tender white leaves of a head of lettuce and pour over the salad dressing. Make the latter by using the recipe for French dressing, using lemon juice instead of vinegar, and adding two tablespoonfuls of Roquefort cheese mashed to a paste to the usual amount of salad dressing.

#### Why the "Baltic" Sea?

How the Baltic sea got its name is unknown. It looks thoroughly classic—"Mare Balticum." But Tacitus knew this stretch of water as the Suevic sea, from the neighboring people of the Suevi, and the name Baltic does not appear before the eleventh century in the "Chorographia Scandinavie" of Adam of Bremen. It is supposed to have some connection with the great and little "Belts." Germans, Swedes and Danes call these waters the East sea (Ostsee)—a name which is obviously impossible for a Russian.—London Standard

rown there are some green tones (these vessels of French make), which are very effective on the table. Some don'ts are involved in the proper care of the charming utensils.

Before using them for the first time the dishes should be soaked in cold water for some hours, as this will help to keep them from cracking on their first exposure to heat. Never put the vessels on the hot stove or in the oven without first putting in water or fat. Do not put them roughly on a metal surface or set them when hot on a wet table. A fierce heat is never desirable, and so, even if the flame of the top of the stove is low, it is best to put an asbestos mat under the vessel used.

Many more things for the preservation of these toylike cooking vessels might be said, and for young housekeepers and girls who want to learn how to cook in a dainty and perfect manner they are certainly more inspiring than the common cook pot, pan and kettle.

#### The Nursery Bib.

Away with the bib and its strings that will knot or the buttons that will not button! Here is the dearest little eating apron that ever covered dainty ruffles or Dickens suits, and when mother realizes what a very simple matter the making of such an apron can be she will hasten to fashion one for the littlest girl or boy in the nursery. A Turkish towel or a simple huck affair can be turned with a snip of the scissors and a few stitches into a comfortable, easily managed apron. At about two-thirds of the length of the towel cut a hole large enough for the little head to slip through. Bind this with tape or scallop it if you wish a little extra fanciness. The shorter side is then gathered or plaited into a belt, made from wide tape or a piece of old toweling, which passes around to the front and holds the apron in place. Cross stitch may make the little apron still more attractive, especially if the design be the favorite nursery chicks, bunnies or kittens. While the linen or huck toweling is prettier, the Turkish toweling is really more practical because of its absorbent qualities. It saves crying over split milk.

#### Oat Bread.

Make a sponge of four cupfuls rolled oats (dry), one-half cupful molasses, two cupfuls boiling water, scant tablespoonful of lard, one teaspoonful salt, one-half yeast cake dissolved in a little lukewarm water. Add only part of the flour, then let rise overnight. Now add about four cupfuls flour and knead about fifteen minutes. Let rise until twice its size, form into loaves, let rise until its bulk is doubled, then bake about forty-five minutes. This makes two large loaves.

#### Pride Taken Down.

If there was one thing more than another that he prided himself on, it was the fit of his clothes.

"I can never get a dress coat really to fit," he said to his partner, as he glanced down at a perfectly made garment, with a hope, of course, that she would at once disclaim the insinuation. "Look at this thing."

"Well, it is atrocious," she said coolly. "But why not save your money and buy one? It is so much cheaper in the long run than hiring."—Philadelphia Ledger.

#### A Scientific Chat About the Daily Vital Needs of Our Bodies.

To be trite, every one has a body in the health of which he or she is more or less interested. "Tell me what you eat and I will tell you what you are" has in it more significance than most people appreciate.

That the body needs proteins and energy metabolism has long been recognized, but not every one is aware of the importance of the body's need for mineral substance.

Mineral foods are as necessary to physical well being as are those furnishing nitrogen or energy.

Contractility and irritability of muscle tissue are dependent in some way upon certain inorganic salts. The rhythmic beating of the heart, according to the most modern medical science, is controlled by calcium, sodium and possibly potassium present in the blood in the tissues, and it is known that the retention of sulphur and phosphorus within the body run parallel to the retention of protein; also that the regulation of the alkalinity of the blood is accomplished, in part at least, through the phosphates. The blood and other fluids must be kept alkaline through a balance between acid and base decomposition products in metabolism.

Vegetables are sources of mineral foods. They furnish iron plentifully and in far larger proportion than do most animal foods. Remember that the pleasantest way to incorporate minerals is through the daily use of fresh salads.

#### Banana Custard.

Place slices of bananas in the bottom of a serving dish, sprinkle with lemon juice and cover with soft custard made by scalding two cupfuls of milk in a double boiler; mix two eggs, one-third cupful of sugar and one-quarter teaspoonful of salt; add the scalded milk, return to double boiler and cook until the mixture thickens and is smooth and creamy. Strain into a cold dish and flavor when cold with one-half teaspoonful of vanilla. If the custard begins to curdle set at once into a dish of cold water and beat briskly with an egg beater.

#### Liver and Rice.

Materials: Lamb's liver, well boiled rice, salt, cayenne, chopped parsley and butter.

Custens: Chopping tray, knife, cup, spoon and buttered baking dish.

Directions: Boil the liver until tender and chop. Put in the baking dish alternate layers of rice and liver, season well with salt, pepper and parsley. Have the top layer rice and moisten the whole with melted butter. Brown in the oven.

#### Tartare Sauce.

Materials.—Two small cucumber pickles, three olives, one teaspoonful capers, one tablespoonful chopped parsley, one-half teaspoonful chopped chives or a few drops of onion juice and one cupful of mayonnaise.

Directions.—Chop all of the ingredients very finely, unless onion juice is used in place of the olives. In which event grate this from the whole onion on a coarse grater. Blend with the mayonnaise and set aside to become thoroughly chilled before using.

Napanee 221

Did you hear the 80th band concert last month? If not don't miss this one. If you did, we know you will come Saturday night. Admission 25, 35 and 50c.

Capt. Milton, Salvation Army Chaplain, of Kingston, will conduct week-end services at the Salvation Army barracks, on Saturday evening and all day Sunday, April 8th and 9th.

On another page of this issue will be found the by-law regulating the traffic on the streets of the Town of Napanee. If you are interested, look it up. Cut out the by-law and preserve it for reference.

Mr. Jas. Gordon expects to move out of his store on the market about the 15th of April. He wishes to reduce his stock before starting on the road, and will sell at much reduced prices. Call and see him. 17-18

The regular monthly meeting of the "U. E. Loyalist" Chapter, will be held in the board room of the public library on Monday next, April 10th, at four o'clock. Important business requires full attendance. Secretary.

Mr. U. M. Wilson has resigned his office as councillor for the Town of Napanee. This step was made necessary by his appointment to the office of County Crown Attorney for the County of Lennox and Addington.

"The perfect correspondence between character and conduct" and "Some of the common excuses or hindrances that prevent so many from entering upon a Christian life" will be the topics on Sunday in Trinity church.

The visit of the Rev. T. Albert Moore to Grace church, Napanee, on Sunday last was a real inspiration to all who heard him. He was greeted with a good congregation; his remarks were both timely and interesting, and the offering liberal—so far, \$88.10. We will be glad to hear Dr. Moore, at any time.

Mrs. (Lieut.) Graham, on behalf of the Napanee Detachment of 146th Battalion, C.E.F., wishes to thank all those who so kindly provided cake for the men on Sunday last, and also those who contributed cake to furnish refreshments for the members of "146th" Brass Band and the Sportsmen Platoon of Kingston, who visited Napanee on Tuesday evening.

A large attendance of the Anglican clergy of this district is expected at the meeting of Bay of Quinte Clerical Union, which is to be held in Napanee on May 3rd and 4th, as a programme of exceptional interest has been arranged. There will be a service in St. Mary Magdalene's church, to which the public is invited, on the evening of Wednesday, May 3rd. The preacher will be the Right Reverend J. C. Roxer, D.D., Bishop of Ottawa.

Of all the pioneer work done in the interests of musical education in Canada, nothing has been more productive of good than the inauguration of the Toronto College of Music Examinations. These Examinations are now widely known and are eagerly sought by teachers and students in all parts of the Dominion. A system of Local Examinations has been established whereby those living at a distance from Toronto are afforded the same advantages as those in attendance at the College. These Examinations are held at Midsummer and at other times as may be arranged. The Musical Director of the College is Dr. F. H. Torkington, who is familiarly known as "The Father of Music in Canada".

House cleaning time means painting time. Don't forget you will find the best paint, varnish and muresco stocks in town as WALLACE'S Drug Store Limited.

### Something to Remember.

The Eastman film (look for the word "Kodak" on end of every spool) is recognized by all photographers to be the fastest, surest and best for all weather conditions, film manufactured. Insist on having Kodak film R. S sold in Napanee only at WALLACE'S Drug Store, Limited. Developing and printing done.

### New Buildings.

Mr. W. J. Normile is building an addition to his bicycle and automobile works. The new addition will be 50x35 feet and will be used as a paint shop. Mr. Normile has also plans drawn for a large addition to his garage. The new buildings will be 100x250 feet. These new additions will make Mr. Normile's garage the largest and best equipped anywhere near here.

### Horticultural Society

The Napanee Horticultural Society is this spring distributing among its members, a package of sweet Pea Seed, a box of Cosmos and a Red Rambler Rose bush. If any member of the Society wishes any further seeds, shrubs or plants, they may procure them through the Society and save the liberal discount given Society members. Leave your list with the secretary, Mr. W. S. Herrington, K.C.

### Council Change.

By reference to the minutes of the town council our readers will learn that Napanee has lost the valuable service of Mr. U. M. Wilson, on the council board, he being unable to serve longer, as he is now County Crown Attorney. Mr. J. E. Robinson, of the Robinson Co., has consented to offer his services to fill the vacancy for the balance of the year. Mr. Robinson is such a good business man that no doubt he will be elected by acclamation on Wednesday evening next. We would welcome Mr. Robinson on the board.

## Women's Patriotic Service and Red Cross Work

Through the Daughters of the Empire.

Several friends have very kindly responded to the call for clothing for suffering refugees, but we shall be glad to receive any more in good condition that anyone can spare us. We take great pleasure in thanking Mrs. George Shorey for a generous donation to our funds a short time since, and also for her untiring efforts in helping us with our work for hospital supplies.

The ladies working at our surgical dressings also have our sincere thanks for their energy, and the splendid results of their labours. Do not be weary of well doing!

We continue to receive appreciative acknowledgements of cases and parcels sent out, which is very encouraging to those having this work so much at heart.

Our room is open every Thursday and Saturday afternoon until 5.30 o'clock—when anyone having parcels to send us will find someone to receive them; we are also pleased to welcome as many friends and workers who can give us an hour or two of their afternoon.

thanks, the following donations applied on the second most recent fund: Miss Sutton's S. S. No. 1, Richmond \$4.00 Gordon Anderson's pupils, of 18, Richmond, \$8.00

A meeting of the President and representatives of the Red Cross Societies, Women's Institutes, and Societies doing Red Cross work throughout the County, will be held in the town hall, Napanee, on April 8th, at 2.30 p.m. object, as to the purchase, of a motor Ambulance will be discussed.

We gratefully acknowledge the donations of money from two young men, Carl and Fred Knox.

We are indebted to the school teachers, here, for a

donation, the proceeds of

given at our rooms last Saturday

were pleased to have with

Nesbitt, Public School Inspector

Mr. Root, Principal of our school

kindly brought with him a

Our rooms will be open Saturday, in the afternoon to be served by some ladies of Valley telephone line. We a good attendance.

Canadian Red Cross

London, Eng.

Mrs. G. A. Thompson,  
Secretary Red Cross,  
Napanee, Ont.

Dear Mrs. Thompson:—  
thanks for your kind letter, you say that the Napanee Red Cross Society, feel they would like something for the prisoners.

For any sum from \$2.00 and upward, parcels can be sent to these men. I am enclosing a list of sample boxes, we send these can of course be sent weekly or fortnightly, according to the amount received for each \$2.50 a month, as you suggest, then of course each fortnight would cost \$1.25.

In every case we ask the to acknowledge their parcels the person or Society from whom receive them. It is not compulsory to continue to do longer than one wishes to do.

It would not be possible to list of prisoners-of-war from ties you ask for, as the lists kept alphabetically and by B not according to the locality which the men come.

It is a much better plan, people, who are willing prisoners, will allow us to money to spend for them, i sending the parcels themselves enclosing herewith some form you will kindly fill in and return. We will then add the name prisoner to each form and the adopter, at the same time patching a parcel in their name.

Yours truly,  
(Sgd.) EVELYN RIVERS-BROWN

Each parcel will contain the following: 1 tin pork and bacon, fruit and cherry cake; 1 tin in oil; 1 tin margarine; 1 box cocoa, sugar and milk.

## THE WAR AND CHRISTIANITY.

Who will ever tell this world the reason why the Righteous God of love and truth has permitted so much desolation and abomination to come upon this earth to blast our youth and blight our earthly abode, while here; and cause the many aching hearts by death and murder caused by this awful war now raging in the morning of the coming of Christ's Kingdom? Can or will we know, in this short stage of life on earth, why all this sorrow and murder and crisis was thrust upon the nations of Christendom, and now the heavens are rent by shell and cannon, and the way our leaders say so near to heaven and yet so near to hades. There is just one cause, just one explanation, and I'll tell you where to find it. It's in the many that profess Him, and still they are very scarce and few, who seek to honor Him by the life of Christ of self-denial, and they love to have the name of Christ and Christian, but with the world, their whole attention and time is occupied, and instead of the Lord being worshipped they worship themselves, and the broad way. These men keep up in a polished kind of way, while hades is in the school house, or church and play yard to-day. None until this awful war of carnage and bloodshed is finished and the anti-christ of the gentile nations which is now being fulfilled in Chapt. 24, 15 of Matthew, and if you like the truth in answer, I'll tell what to do. Turn to the books of Isaiah, Daniel and Rev. and you will find it there, so very plain "Turn from your evil ways for wealth, pleasure, honor, the lusts of the eye, The lusts of the flesh, the pride of life for all people born of the water and of Spirit know this world insane, at the present time, and the kaiser is the beast that rises out of the sea and his number is six hundred, three score and six, Rev. 13, 18. That the number of this godless, reckless man of Germany, he has filled the heavens and earth with sorrow, ignored the law of God and man, by bringing on this godless war and has cursed the German nation, and has struck the very heavens as well as the earth with abomination and devastation, which is to take place in the time of the filling of the gentile nations now going on at the present time. The only alternative for man and men and nations, turn from your anti-christ and humble yourselves, meek, lowly before God and Christ and follow him, as the leaders for Christ are very few, on the very eve of the coming of Christ's kingdom. For now these are the days for many to sorrow. It is the age of greed for pleasure and gold and pride foretold by Christ's prophet and apostle and God Himself. Now remember His warning as you see these things appearing, considering well and set your house in order as there is to be an awful dearth upon the earth to follow the plague of the sword. Read the 2nd chapter of Daniel carefully over and note well the 18th verse on down to the 45th verse, and as the Head of the Church, Christ was born nearly 2000 years ago and the body is to be born now soon. Shall the earth be made to bring forth in one day, or shall a nation be born at once for as soon as Zion travailed she brought forth her children. The Lord saith shall I bring to birth and not cause to bring forth, (Isaiah 66 chap.) The stone that was cut out of the mountain without hands consumeth all the other kingdoms upon the earth and righteousness shall fill and cover the whole earth, as the waters cover the sea. This is to be the fulfilling of the gentile nations at the present time, (Isaiah 11th Chapt.) when all beasts upon the earth are to be meek and

## TRINITY METHODIST CHURCH

Rev. S. Sellery, M.A., B.D., Pastor.  
The pastor will conduct both services.

sea. This is to be the fulfilling of the gentle nations at the present time, (Isaiah 11th Chapt.) when all beasts upon the earth are to be meek and man won't have to use force any longer and the cow and the lion will eat straw together, and the wolf also shall dwell with the lamb and the child shall play on the hole of the asp. The gospel sound has gone into all the earth and the apostles' words unto the ends of the world, (Romans 10, 18th verse) this being the time of the gentle harvest near the end of the world and the coming of Christ's and the resurrection of the dead, when the angel will preach the everlasting gospel on earth to every nation, kindred, tongue and people (Rev. 14, 6th verse). And the time is near when the four angels which are bound in the great river Euphrates for to slay the third part of men (Rev. 9, 14, 15), and the sixth angel poured out his vial wrath upon Turkey. Their murdering power will be dried up (Rev. 16, 12) and after these things another angel will come down from heaven with great power to destroy the mystic Babylon, the great wickedness now prevailing upon the earth, (Rev. 18, 2, 3).

### THE HEART OF LONDON.

Where the Land Is Valued at Over \$16,000,000 Per Acre.

There is an amazing price set upon the land of London. In the center of the English metropolis tiny lots have been sold for fortunes.

An acre there is the dearest in the world. Many a transaction over ground in the heart of the city has set the figure of \$16,250,000 per acre. One square mile of London is valued at \$750,000,000. The land beneath the Bank of England at low estimate is worth \$35,000,000, and there are only three acres in that tract too.

There are places on Queen Victoria, Upper Thames, St. Mary-at-Hill and Cannon streets where one square inch is worth \$1.25. In Lombard street and King William street prices have ranged from \$200 and \$250 to \$350 per square foot.

Cornhill property has been bought for more than \$12,000,000 an acre. Threadneedle street land for \$350 per square foot, and a church in Austin Friars, not such a large church either, was tempted with an offer of \$5,000,000 for the land beneath it.

The steady lifting of London land in price has brought fabulous riches to the owners. Families have risen to prominence on no other ground than that they owned small bits of ground in valuable sections. Rents are high there, and sales have made owners permanently wealthy.

Beauty Fills the House.

"Is she pretty?"

"Pretty? Why, that girl is so pretty that plenty of fellows are glad to call on her father and mother."

True courage is not incompatible with nervousness, and heroism does not mean the absence of fear, but the conquest of it.
